

## Vaginitis and Other Related Conditions

### Objectives

- Outline epidemiology, clinical manifestations, diagnosis, treatment and preventive measures for infectious vaginitis, cervicitis, and pelvic inflammatory disease
- Discuss the role of microbiome and vaginitis and other related conditions
- Review the new therapies being proposed for treatment of vaginitis and other related conditions
- Differentiate between infectious and non-infectious vaginitis

### Content Outline

1. Vaginitis and Related Conditions
  - A. Epidemiology
  - B. Clinical manifestations
  - C. Diagnosis and laboratory findings
  - D. Treatment and management
  - E. Preventive measures
2. Vaginal Microbiome
  - A. Composition
  - B. Interface with vaginitis and other related conditions
  - C. Beneficial and pathogenesis effects

### Reading Material Resources

**Module WB2533: Vaginitis and Other Related Conditions** is based on the resources listed below. A copy of each resource is included with the module.

Infectious Vaginitis, Cervicitis and Pelvic Inflammatory Disease, Shroff, Swati, *Medical Clin N Am* 107, (2023), 299-315

Microbiome and Vulvovaginitis, Powell, et al., *Obste Gynecol Clin N Am* 50, (2023), 311-326
