Electronic Fetal Monitoring exam

The chart shows the percentage distribution of questions on the Electronic Fetal Monitoring exam across the major content categories covered on the examination.

The major focus is on Pattern Recognition and Intervention. EFM Monitoring Equipment and Professional Issues have the least emphasis.
EXAMINATION CONTENT
FOR TESTS TAKEN BEFORE APRIL 1, 2020

EXAM OUTLINE

This is an outline of topics and areas which may be included in the Electronic Fetal Monitoring examination.

Percentages identified for the topic areas represent a range of the number of test questions assigned to each content area and therefore might total more or less than 100 percent. These ranges do not necessarily reflect the content of future exams.

10.00 Electronic Monitoring Equipment (5%)
- Fetal heart rate monitoring
- Uterine monitoring
- Equipment failure and troubleshooting
- Artifact Detection

11.00 Physiology (10%)
- Uteroplacental
- Uterine activity
- Factors affecting fetal oxygenation
- Effects of maternal drugs on the fetus

12.00 Pattern Recognition and Intervention (70%)
- Baseline heart rate
- Fetal heart rate patterns
- Response to tachysystole
- Dysrhythmias and other variant patterns
- Common Complications

13.00 Adjunct Fetal Surveillance Methods (10%)
- Auscultation
- Fetal movement counting
- Nonstress testing
- Fetal acid base interpretation
- Biophysical profile
- Fetal Acoustic Stimulation

14.00 Professional Issues (5%)
_including: Evidence Based Practice, Legal/Ethical/ Communication Issues, Research, Patient Safety_
EXAMINATION CONTENT
FOR TESTS TAKEN BEFORE APRIL 1, 2020

ASSOCIATED COMPETENCIES

• Apply knowledge of maternal-fetal assessment methods when selecting electronic fetal monitoring or intermittent auscultation to evaluate fetal status.

• Interpret data from the electronic fetal monitor to differentiate between actual fetal data and equipment failure.

• Use knowledge of the advantages and disadvantages of electronic fetal monitoring to provide information to the pregnant woman and her support person(s).

• Apply knowledge of fetal heart rate regulation to the interpretation of electronic fetal monitoring data.

• Interpret data from electronic fetal monitoring to differentiate between normal and abnormal fetal heart rate patterns.

• Apply knowledge of common pregnancy complications to the development of a comprehensive plan of care based on electronic fetal monitoring data.

• Apply knowledge of uteroplacental and maternal-fetal physiology as they relate to fetal oxygenation.

• Identify indications for adjunct fetal assessment and incorporate findings into the plan of care.

• Incorporate knowledge of current practice and legal practices into nursing care.
STUDY GUIDE
FOR TESTS TAKEN BEFORE APRIL 1, 2020

ELECTRONIC MONITORING EQUIPMENT
• Fetal heart rate monitoring
  -Internal
  -External
• Uterine monitoring
  -External
  -IUPC
• Equipment failure and troubleshooting
• Artifact Detection

PHYSIOLOGY
• Uteroplacental
  -Uteroplacental circulation
  -Fetal circulation
  -Fetal heart regulation
• Uterine activity
  -Resting tone
  -Contractions
  Frequency
  Duration
  Intensity
• Factors affecting fetal oxygenation
  -Uterine activity
  -Maternal factors
  -Anesthesia
  -Drugs (Therapeutic & Recreational)
  -Placental factors
  -Umbilical blood flow
  -Acid base and cord blood gases
• Effects of maternal drugs on the fetus

PATTERN RECOGNITION AND INTERVENTION
• Fetal baseline heart rate
  -Bradycardia
  -Tachycardia
  -Variability
  -Sinusoidal
• Fetal heart rate patterns
  -Accelerations
  -Decelerations
  Early
  Variable
  Late
  Prolonged
• Response to tachysystole
• Dysrhythmias and other variant patterns
  -Supraventricular tachycardia
  -Congenital heart block
  -Ectopic beats
• Common Complications
  -Preterm Labor
  -Hypertension
  Gestational hypertension
  Preeclampsia-eclampsia
  HELLP syndrome
  Chronic (essential)
  -Postdates Pregnancy
  -Diabetes
  (Gestational, Type 1, Type 2)
  -Placental disorders
  (previa, abruption)
  -Uterine rupture/scar dehiscence
  -Infections
  -Multiple gestations
  -Maternal Obesity

ADJUNCT FETAL SURVEILLANCE METHODS
• Auscultation
• Fetal movement counting
• Nonstress testing
• Fetal acid base interpretation
• Biophysical profile
• Fetal Acoustic Stimulation

PROFESSIONAL ISSUES
• Evidence Based Practice
• Legal
• Ethical
• Communication Issues
• Research
• Patient safety
The chart shows the percentage distribution of questions on the Electronic Fetal Monitoring exam across the major content categories covered on the examination.

The major focus is on Pattern Recognition and Intervention. EFM Monitoring Equipment and Professional Issues have the least emphasis.

STUDY GUIDE
FOR TESTS TAKEN ON/AFTER APRIL 1, 2020

PATTERN RECOGNITION AND INTERVENTION

- Fetal baseline heart rate
  - Bradycardia
  - Tachycardia
  - Variability
  - Sinusoidal
- Fetal heart rate variability
  - Identification
  - Causes
- Abnormal uterine activity
  - Decreased blood flow
  - Response to hypertonus
  - Tachysystole
- Fetal dysrhythmias
  - Supraventricular tachycardia
  - Congenital heart block
  - Ectopic beats
- Maternal Complications
  - Preterm Labor
  - Hypertension
    - Gestational hypertension
    - Preeclampsia-eclampsia
    - HELLP syndrome

FETAL ASSESSMENT METHODS

- Auscultation
- Fetal movement and stimulation
- Nonstress testing
- Cord Blood Acid Base Testing
- Biophysical profile
- Fetal Acoustic Stimulation

PROFESSIONAL ISSUES

- Legal
- Ethics
- Patient safety
- Quality Improvement
STUDY RESOURCES

THE NICHD LANGUAGE AND DEFINITIONS ARE UTILIZED IN THE EXAM AS NOTED IN THE 2008, 2010 UPDATES AND 2015 REAFFIRMATION. ALL EFM TRACINGS USED IN THE EXAM ARE SET AT A SPEED OF 3CM/MIN FOR PURPOSES OF INTERPRETATION

The following references are used by content team members and outside item writers to generate test questions for the EFM examination. This list is not intended as an all-inclusive list of references, nor does it imply that items on the current examinations were necessarily referenced from any of these publications.
