## About this Guide

This guide lists fees and provides information that will help you prepare for the examination. It includes the exam content in outline form, competency statements and study guide. It also provides sample exam questions to familiarize you with question format, study resources and lists some of NCC administrative policies & procedures. It is recommended that you familiarize yourself with the information in this guide.

NCC examinations are offered in several different test administrations options. The NCC publication *Guide to Testing Methods* will explain the different rules and policies based on how you are taking the examination. Please download this publication from the NCC website and review the exam administration options. It should answer your questions about the NCC examination process.

If you have other questions, please feel free to contact NCC through the NCC website at NCCwebsite.org.

## NCC’s Philosophy of Testing

Certification is an evaluative process that provides the opportunity for nurses in the obstetric, gynecologic and/or neonatal specialty to demonstrate publicly what they know and to be recognized for the special knowledge they possess. The NCC certification carries no licensing authority. The ability to practice as a nurse is regulated by the state boards of nursing, and while certification may be required in some states for advanced practice roles, NCC has no regulatory power to require states to recognize NCC certification for this purpose. Practice and educational standards are reflected in the certification process, but the responsibility for development of such standards rests with the professional nursing specialty organizations and the nursing educational community. NCC encourages individual nurses to seek out information about how certification relates to state licensure requirements, program accreditation of the educational institutions attended, the educational and practice standards of national nursing specialty organizations, and employment expectations.
FEES & GENERAL POLICIES

EXAMINATION AND RELATED FEES

EXAMINATION FEES*
Computer Exam Fees are $325 which includes the non-refundable $50 application fee.

Professional Education Center (PEC) Exam Fees are $275 which includes the non-refundable $50 application fee.

*Examination fees are subject to change.

CHANGE REQUEST
Candidates who cannot take their currently scheduled examination, have missed their testing date or need to take a different exam - can request a change for a fee of $125. Details are on the NCC website.

WITHDRAWAL FEE
A computer testing candidate who withdraws from testing is subject to a $165 withdrawal fee. The candidate will receive $160 of their $325 payment, minus any outstanding charges. PEC candidates cannot withdraw.

RETEST FEE
Retest candidates must pay full application and examination fees. There are no discounts and they must complete a 90-day wait period* before resubmitting an application for testing. (*see Retest Policy page 4). Certifications exams of the same specialty can only be taken TWICE in a calendar year for the same candidate.

SUBSTITUTION FEE
Candidate substitutions are not allowed for any reason.

THIRD PARTY PAYMENTS
Applicant fees paid by third parties will be refunded to the third party in accordance with stated refund policies, in the event the applicant is determined ineligible or withdraws within the specified time.

NO REFUNDS WILL BE CONSIDERED FOR ANY CANDIDATE
• who has taken an examination
• who is not successful in achieving certification
• who failed to take the exam via computer within the 90-day testing window and did not submit a change request within stated time frames
• who is beyond the first 30 days of their eligibility window and is unable to schedule their exam within their eligibility window.
PAYMENT INFORMATION

• All applications are subject to a nonrefundable application fee.
• All fees are nonrefundable except where otherwise noted.
• Payments can be made by credit card (Visa, American Express and MasterCard only).
• Payments can be made by check: bank routing number and account number required.
• For payments made by third parties, any refund will be issued to the third party and not to the applicant.
• All payments must be in US funds.
• NCC does not accept debit cards or split payments (part check and part credit card).
• Exam fees can only be submitted online at the NCC website. Applications will not be accepted by mail, phone or fax.
• NCC will accept group payments for certification exams from institutions. Details are on the NCC website.

OTHER NON-REFUNDABLE PAYMENT RELATED FEES

INCOMPLETE APPLICATION FEE
All incomplete applications are subject to a non-refundable $30 reprocessing fee upon the submission of proper documentation. Incomplete applications are those submitted with missing information, (e.g. required licensure information and corroborating uploaded documentation; containing incomplete or incorrect information; or do not include full fee payment).

RETURNED CHECKS AND CREDIT CARD CHARGEBACK FEE
A $30 fee will be assessed for any check or e-check returned or a credit card payment disputed for any reason. Remittance thereafter of all fees and applications must be in the form requested by NCC.

LICENSE VERIFICATION
If licensure information is requested requiring an additional submission, the candidate will have two weeks to provide the license with all the correct information and pay the non-refundable $30 reprocessing fee. If this is not provided within the two weeks, the application will be marked ineligible. Ineligible applicants will receive a refund minus the $50.00 non-refundable application fee. There are no refunds or withdrawals for applications using a bulk code.

VERIFICATION OF CERTIFICATION
Third party notification of status will not be released without authorization from the RNC. A $30 fee is required for any third party notification or issuance of duplicates of test results reports. Verification requests can only be submitted after official written results have been received in the mail.

Verification requests can only be made via the online verification system on the NCC website. NCC does not issue verifications via the mail or fax.

Certification will be revoked or withheld if a returned check or a chargeback request on a credit card payment results in loss of income to NCC and the monies are not recovered in an alternate payment. Fees received at any time will first be applied to any unpaid prior certification/special fees.
Fees & General Policies

Unsuccessful Candidates
A candidate who sits for the examination and does not receive a passing score is not eligible for any refund nor for any credit on any later NCC exam.

Nondiscrimination
It is the policy of NCC that no individual will be excluded from the examinations as a result of age, sex, race, religion, national origin, ethnicity, disability, marital status, sexual orientation, military status or gender identity.

Americans with Disabilities Act
Special testing accommodations will be provided pursuant to the Americans with Disabilities Act. Any requests for special testing accommodations must be made in writing and submitted with the application. The accommodation request form can be downloaded from the NCC website. Upon receipt of a request for special accommodations, NCC will contact the applicant. Such requests must be signed by a clinician, physician, or other qualified specialist with training and experience appropriate to diagnose and treat the specified disability.

General Policies

Exam Category Changes
You can only request an exam category change by completing a Change Request Form on the NCC website and submitting with non-refundable payment of $125. Candidates are only allowed one change option (e.g. if you reschedule your exam date, you will not be able to change your exam category). All change requests must be approved by NCC. There will be no refund of original or Change Request fees. Eligibility must be re-established for the new exam category, and additional documentation and fees may be required. The time to consider eligibility for the new category will count toward the original assigned 90-day computer testing window. Examination category cannot be changed from a subspecialty or RN Core application to a NNP or WHNP certification. Examinees must take the exam for which they have been determined eligible. No changes will be permitted on examination day. If a candidate knowingly or unknowingly takes an examination other than the one they were found eligible to take, the examination will not be scored. No refunds will be allowed, and all fee policies will apply if the candidate reapplies for an examination. See website for complete details.

Retest Policy
You may retake the examination if you do not pass. You must reapply, submit all applicable fees and documentation, and re-establish eligibility according to the appropriate deadlines. There is no limit to the number of times you may retake the examination. However, the maximum number of times a candidate can take the same NCC test in a calendar year is two.

All retest candidates must wait 90 days from the date their exam was taken before they can submit a new application to retest.
- this date is provided in the candidate’s results notification
- this 90-day wait period affects all modes of testing

Any loss of power or internet during an exam in which there was more than 15 minutes of testing with exposure to more than 10% of the exam requires a retest after 90-days. There is no need to complete a new application but you will need to notify NCC to move your eligibility window so it begins 90-days after the exam attempt. Please notify NCC immediately if this occurs so that a new window can be set.

If a retest application is submitted prior to the 90-day wait period, the application will be returned as ineligible. The applicant will be subject to the $50 non-refundable application fee.
**Fees & General Policies**

**GENERAL POLICIES (CONTINUED)**

**INTERNET DISCONNECTIONS**
If you start the exam and are disconnected please use the PSI tech lines if you are testing with LRP or if at a test center please discuss with the proctor to attempt to get reconnected and continue testing.

If you are unable to get reconnected after starting the exam, the timing for a second attempt to take the exam will be based on how much time and how many questions you were exposed to. If you are disconnected and cannot be reconnected and have tested for under 15 minutes and were exposed to less than 10% of the exam you will be rescheduled within your current eligibility window. **You must work directly with PSI that day to reschedule and if you run into any issues you must notify NCC within 3 days of testing.** If you tested for longer than 15 minutes and/or saw more than 10% of the questions on the exam you will have to wait 90 days and will be rescheduled. A decision on the timing of your second attempt will be made after reviewing the test exposure. Please note, you will need to retest at a computer center. Please notify NCC of the internet disconnection issue as soon as you have convenient computer access.

**APPEALS PROCEDURE**
Any request to waive any policy of the NCC Board of Directors relative to eligibility, administration, examination content issues, or certification maintenance must be received in writing within 60 days of the dispute. All requests should be sent to the attention of the NCC President at nccpresident@nccnet.org. The correspondence should contain a detailed account as to why the NCC policy should be waived or the candidate’s status should be changed. Such requests are referred to the NCC Policy Review Committee of the Board of Directors. All decisions will be provided in writing. Cases not resolved by the Policy Review Committee will be referred to the full Board of Directors.

**DESIGNATION AUTHORIZATION**
Certification is a non-transferable, revocable, limited, non-exclusive license to use the certification designation “RNC-OB®”, subject to compliance with the policies and procedures, as may be revised from time to time.

Any use or display of NCC certification marks and/or logos without the prior written permission of the NCC is prohibited. Any candidate or certificant who manufacturers, modifies, reproduces, distributes or uses a fraudulent or otherwise unauthorized NCC certificate, NCC designation or other credential may be subject to disciplinary action, including denial or revocation of eligibility or certification. Any individual who engages in such behavior also may be subject to legal action.

---

**POLICIES ARE SUBJECT TO CHANGE WITHOUT NOTICE.**
ABOUT THE EXAM

TIMED EXAMINATION
Three (3) hours are allotted to complete the examination.

EXAM FORMAT
The Inpatient Antepartum Nursing examination consists of up to 175 test questions. 150 are scored and the remainder are embedded in the exam as pretest items. The pretest items do not count toward the examinee’s final results.

- There is one question format used for all NCC examinations.
- Each question has a premise (stem) and three alternative answers.
- The answer options are alphabetized by the first word in each answer option to randomize the answers.
- Computer tests are delivered in a different random order for each candidate.
- Questions will test both basic knowledge and application of knowledge.
- Questions that contain laboratory data will show results in conventional units of measure with international units in parentheses.
- Drugs are listed in both generic and trade names where appropriate.

EXAMINATION CONTENT DEVELOPMENT

The development of NCC certification involves many individuals and involves a meticulous process of review. There are three major groups that contribute to the test development process:

ITEM WRITERS:
RNCs and others identified with special expertise have the responsibility of drafting test items per designated assignment for review by the content team and expert reviewers. Item writers are solicited from the NCC certified population, by recommendations or through the volunteer portal.

REVIEWERS:
Reviewers are RNCs or other designated experts who assist the content teams in review of test items developed by the item writers. Reviewers are responsible for reviewing items for content relevance and confirming that references cited for the questions support the items as written.

CONTENT TEAMS:
Content team members are experienced practitioners and are appointed on an annual basis by the NCC President. Content teams are solicited from the NCC certified population, by recommendations or through the volunteer portal. To see the current membership composition of the Content Team responsible for the Inpatient Antepartum Nursing examination, please visit the NCC website under the section on NCC Leadership.

Content team members are RNCs or other identified experts who:
- develop and update the test outline and competency statements
- review test items developed by item writers
- review item statistics from exam administrations and pretest examinations
- approve the exam forms to be administered
- review item banks

In addition, NCC uses volunteers for standard setting and content validation studies.
The above chart shows the percentage distribution of questions on the Inpatient Antepartum Nursing exam across the major content categories covered on the examination. The major focus of the examination is on obstetric complications and medical complications in pregnancy. Less emphasis is maternal physiology & assessment and fetal physiology & assessment with pharmacology having the lowest number of questions assigned.

Expectations for inpatient antepartum nursing is that nurses practicing in this field will have knowledge of providing a coordinated approach to care, continued risk assessment and psychosocial support to hospitalized pregnant women during antepartum.
**EXAM OUTLINE**

Areas of knowledge to be tested on the Inpatient Antepartum Nursing examination are listed in the following outline. This list is not intended as an all-inclusive review of the scope of knowledge of the inpatient antepartum nurse. It is provided only to help certification candidates evaluate their own nursing practice.

Percentages identified for the topic areas represent the number of test questions assigned to each content area. These percentages do not necessarily reflect the content of future examinations.

The focus of the examination will be on assessment and management of the patient in the antepartum unit.

ASSOCIATED COMPETENCIES

- Demonstrate knowledge of normal anatomy and physiology of pregnancy to the care of the high risk inpatient antepartum patient.

- Identify risk factors that may lead to obstetric and medical complications of pregnancy. Interpret data during the inpatient antepartum maternal and fetal assessment to differentiate between normal and abnormal. Develop, evaluate and modify a comprehensive plan for management of the high risk antepartum patient.

- Delineate the warning signs that warrant immediate medical intervention.

- Utilize evidence-based practice guidelines to provide safe and individualized care for the high risk obstetric patient.
MATERNAL PHYSIOLOGY AND ASSESSMENT

I. Physiology of Pregnancy

- Cardiovascular System
  - Hemodynamic and Oxygen Transport Assessment
  - Heart Rate
  - Blood Volume
  - Plasma Volume
  - Cardiac Output
  - Blood Pressure
- Respiratory System
  - Lung Volume and Ventilation
  - Oxygen and Carbon Dioxide Exchange
  - Mechanical Changes
- Gastrointestinal System
  - Absorption
  - Esophageal Changes
  - Nausea and Vomiting
  - Weight Gain
- Hematologic and Immune System
- Renal and Urinary System
  - Renal Blood Flow, Glomerular Filtration and Tubular Function
  - Glycosuria and Proteinuria
- Fluid and Electrolyte Balance
- Reproductive/Utero-placental
  - Uterus, Cervix, Ovaries, Vagina and Breasts
  - Human Placental Lactogen
- Endocrine/Metabolic
  - Hormones and Other Mediators
  - Estrogens, Progesterone, Relaxin, Prostaglandins, Prolactin
  - Metabolic Changes
  - Endocrine System (Thyroid, Parathyroid, Pituitary and Adrenal Glands)
- Placental Anatomy and Physiology

II. Maternal Assessment and Diagnostic Testing
(including lab values)

- History
  - Maternal Cardiac Disease/Anomalies
  - Hypertension
  - Respiratory Disease
  - Gastrointestinal Disease
  - Blood Dyscrasias and Coagulopathy
  - Renal/GU Disease
  - Neurologic Disorders
  - Autoimmune Disorders
  - Reproductive Complications
  - Skeletal Disorders
  - Endocrine Disorders
  - Diabetes
  - Hypothyroidism/Hyperthyroidism
  - Infectious Diseases
  - Genetic Disorders/Congenital Anomalies
  - Mental Health Disorders (Depression, Anxiety, Schizophrenia, PTSD)
  - Nutritional Factors
- Physical Examination
  - Cardiovascular System
  - Respiratory System
  - Neurologic System
  - Reproductive System
  - Renal System
  - Integumentary System
  - Stages of Gestation
II. Maternal Assessment and Diagnostic Testing  
(including lab values) continued

- Laboratory Tests
  - Biochemical Studies
    - Renal to include urinalysis
    - Hepatic
    - Endocrine/Metabolic
    - Acid-base/Electrolytes
  - Hematologic Studies
    - CBC with differential
    - Coagulation profile
    - Lipid profile
  - Immunologic Studies
    - Rh, ABO, Anti-D antibody, indirect Coombs
    - Sexually Transmitted Infections
  - Diabetic Screening
  - Genetic Screening
  - Hepatitis
  - Microbiologic Studies
    - Sepsis
    - Bacteriuria
    - Vaginal cultures
  - Blood gases

- Diagnostic Tools and Procedures
  - Pulse Oximetry
  - Ultrasound
  - Doppler Studies
  - Biophysical Profile
  - Oxygen Therapy

III. Psychosocial Health (e.g., mental, emotions, environments, cultural)

- Family Dynamics and Cultural beliefs
- Chemical Dependency/Substance Use Disorders
- Abuse/Intimate Partner Violence
- Teratogen Exposure and Poisoning
- Suicide Risk
- Risk of Falls
- Substance Use Disorders and Withdrawal (drug, alcohol, nicotine)
- Mental Health Disorders
  - Depression
  - Anxiety
  - Posttraumatic stress disorder (PTSD)
STUDY GUIDE

FETAL PHYSIOLOGY AND ASSESSMENT

I. Fetal Physiology
• Cardiovascular System
• Respiratory System
• Gastrointestinal System
• Neurologic System
• Renal System
• Growth, Metabolism and Development
  - Fetal Growth Restriction

II. Antenatal Testing
• Ultrasound
• Doppler
• Nonstress Testing
• Contraction Stress Testing
• Cell-free DNA Analysis
• Biophysical Profile
• Fetal Movement Counting
• Amniotic Fluid Analysis
• Chorionic Villus Sampling (CVS)
• Amniocentesis
• Fetal stimulation
• Fetal Laboratory Evaluation
  - Maternal Serum Alpha fetoprotein (AFP) Evaluation
  - Kleiheuer Betke Test
  - Fetal Blood Gases/ Umbilical Blood Gas
• Quad Screen Test

III. Electronic Fetal Monitoring
• Physiologic Basis for Fetal Heart Rate Monitoring
• Recognition and Interpretation of
  - Episodic/Periodic Changes of the Fetal Heart Rate
  - Dysrhythmias
• Pattern Interpretation
  - Baseline Rate
    - Minimal, Moderate, Marked Variability
    - Bradycardia
    - Tachycardia
  - Sinusoidal Pattern
  - Accelerations
  - Decelerations
  - Tachysystole
OBSTETRIC COMPLICATIONS

I. Hypertensive Disorders
- Gestational Hypertension
- Chronic Hypertension
- Chronic Hypertension with superimposed pre-eclampsia
- HELLP Syndrome
- Preeclampsia with or without severe features and Eclampsia
  - Risk Factors
  - Diagnostic Criteria
  - Management

II. Gestational Diabetes
- Pregestational Diabetes
  - Type 1
  - Type 2
- Diabetic Ketoacidosis
- Hypoglycemia and Hyperglycemia
- Indications for therapeutic management and surveillance

III. Fetal Complications
- Multiple Gestation
  - Fetal Growth Restriction
  - Chorionicity
  - Mono/Di
  - Discordant Twins
  - Twin to Twin Transfusion Syndrome
  - Vanishing Twin Syndrome
- Fetal Anomalies
- Fetal Demise/Perinatal Loss
  - Perinatal palliative care
  - Grief and grieving

IV. Utero-Placental and Amniotic Fluid Disorders
- Placental Abruption
- Placenta Previa
- Vasa Previa
- Placental Insufficiency
- Placental Accreta
- Cord abnormalities
  - Marginal velamentous
  - Abnormal insertion
  - Single artery/two vessel cord
- Cervical Insufficiency
- Uterine Rupture or Inversion
- Obstetric Hemorrhage
- Amniotic Fluid Embolism
- Prelabor (Premature) Rupture of Membranes
- Chorioamnionitis (Intrauterine inflammation infection or Triple I)
- Polyhydramnios and Oligohydranmios
- Hydatidiform Mole

V. Obstetric Emergencies (e.g., trauma, birth, maternal collapse)
- Trauma
  - Blunt Trauma
  - Motor Vehicle Crashes
  - Violence
  - Penetrating abdominal trauma
  - Gastrointestinal bleed
- Emergency birth
  - Preterm Labor
  - Malpresentation
  - Cord Prolapse
  - Cesarean Birth
- Resuscitation and Stabilization (Mother, Fetus and Newborn)
  - Intrauterine resuscitation
  - Indications and Initial Evaluation
  - Techniques for maternal and neonatal resuscitation
- Hyperemesis gravidarum
- Cardiac Arrest
- Pulmonary Embolism
I. Cardiovascular and Respiratory Disorders
• Cardiovascular Disorders
  - Congenital
  - Acquired
  - Ischemic
  - Valvular
  - Cardiomyopathy
  - Marfan Syndrome
  - Arrhythmias and Dysrhythmias
• Respiratory Disorders
  - Dyspnea
  - Pulmonary Embolus
  - Asthma
  - Cystic Fibrosis
  - Smoking
  - Pulmonary Edema
  - Aspiration Pneumonia
  - Pneumonia
  - Pulmonary Hemorrhage

II. Hematologic and Thromboembolic Disorders
• Sickle Cell Anemia/Thalassemia
• Iron Deficiency Anemia
• Megaloblastic Anemia
• Hemoglobinopathies
• Thrombocytopenia (TTP and ITP)
• Disseminated Intravascular Coagulation (DIC)
• Venous Thromboembolism (VTE)
• Deep Vein Thrombosis (DVT)
• Antiphospholipid Antibodies
• Obstetric Hemorrhage
• Hemorrhagic and Hypovolemic Shock

III. Infectious Disease
• Sexually Transmitted Infections
• Bacterial and Viral Infections
  - Human Immunodeficiency Virus
  - Influenza
  - Measles/Rubella
  - Cytomegalovirus
  - Herpes Virus
  - Varicella
  - Human Papillomavirus
  - Group B Streptococcal Infection
  - Toxoplasmosis

- Hepatitis
- Pavlovirus
- ZIKA

IV. Metabolic, Endocrine and Autoimmune Disorders
• Thyroid and Parathyroid Diseases
  - Thyrotoxicosis, thyroid storm, hypothyroidism, thyroiditis, hyperthyroidism
• Pituitary and Adrenal Disorders
  - Acute Adrenal Insufficiency
  - Hypopituitarism
  - Cushing Syndrome
• Autoimmune Disorders
  - Systemic Lupus Erythematosus
  - Antiphospholipid Syndrome
  - Rheumatoid Arthritis
  - Systemic Sclerosis
  - Celiac Disease
  - Sarcoidosis

V. Neurological Disorders
• Spinal Cord Injury
• Epilepsy and Seizures
• Cerebrovascular Accidents
• Headaches and Strokes
• Multiple Sclerosis
• Neuroprotection

VI. Renal and Hepatic Disorders
• Asymptomatic Bacteriuria
• Pyelonephritis
• Lupus Nephritis
• Nephrolithiasis
• Acute Kidney Injury (AKI)
• Renal Failure (Acute Chronic)
• Acute Fatty Liver of Pregnancy
• Acute Pancreatitis
• Chronic Hepatitis
• Cholelithiasis, Cholecystitis, Cholestasis of Pregnancy
• Budd Chiari Syndrome
PHARMACOLOGY

I. Pharmacodynamics and Pharmacokinetics
   • Pharmacodynamics (mechanism of action, concentration and half-life)
   • Pharmacokinetics (distribution, absorption, excretion and metabolism)

II. Pharmacotherapeutics (e.g. medication, fluids, blood component product)
   • Analgesics/ Sedatives /Anesthetics (Regional vs. General)
   • Anticoagulants and Thrombolytic Therapies
   • Anticonvulsants
   • Antihypertensives
     - Esmolol
     - Metoprolol
     - Labetalol
     - Nifedipine
     - Hydralazine
     - Nicardipine
   • Adrenergic agonists and antagonists/ Vasopressors
     - Epinephrine, phenylephrine, norepinephrine
   • Antibiotics and Antimicrobials
   • Progesterone Therapy
   • Tocolytics
     - Terbutaline
     - Nifedipine
     - Indomethacin
   • Antiarrhythmics
   • Antidiabetic Agents (oral and IV)
   • Uterotonics
     - Oxytocin
     - Misoprostol
   • Opioids and Drugs for Substance abuse withdrawal
     - Methadone
     - Buprenorphine
   • Antenatal Corticosteroids
     - Betamethasone
     - Dexamethasone
   • IV Iron Dextran/ Ferric gluconate
   • Magnesium Sulfate: maternal and Fetal CNS Protection
   • Volume Resuscitation and Blood Component Therapy
     - Blood and Blood components
     - Hypovolemia
     - Immunologic and Nonimmunologic Transfusion Reactions

THE EXAM REFLECTS THE NICHD TERMINOLOGY RELATIVE TO ELECTRONIC FETAL MONITORING ADOPTED IN 2008 (Reaffirmed 2019)
SAMPLE QUESTIONS

INPATIENT ANTEPARTUM NURSING SAMPLE QUESTIONS

Listed below are five sample questions to acquaint you with the test question format. These questions do not reflect the scope or the difficulty level of the questions on the actual examination. The reference from which each question is derived is also cited. However, other references might substantiate a different answer, and the answer shown here might be substantiated by other references. The rigorous review to which actual test questions are subject is not applied to these sample questions. The focus that should be attended to in reviewing these items is format, not content.

1. A nurse is auscultating breath sounds in a pregnant woman having an acute asthma attack and anticipates hearing
   A. inspiratory wheezing
   B. rales
   C. rhonchi

   Answer: C

2. Deoxygenated blood is carried from the fetus to the placenta via the
   A. spiral arteries
   B. umbilical arteries
   C. umbilical vein

   Answer: B

3. The use of tocolytic agents has been demonstrated to reduce the incidence of
   A. birth within 2 to 7 days
   B. cerebral palsy
   C. premature rupture of membranes

   Answer: A

4. A woman at 28-weeks-gestation has a baseline blood pressure of 110/77 mm Hg. During the next 24 hours, her blood pressure readings are elevated and range from 155/95 mm Hg to 162/97 mm Hg. She has no complaints and has no proteinuria. Based on these findings, the patient has developed
   A. chronic hypertension
   B. gestational hypertension
   C. preelampsia

   Answer: B

5. A woman in the antepartum unit has a witnessed eclamptic seizure. After alerted the medical team, the first action that the nurse should take is to
   A. assess vital signs and fetal heart rate
   B. ensure a patent airway
   C. reposition to lateral recumbent position

   Answer: C

**SCORING & TEST REPORT**

**HOW EXAMS ARE SCORED**

NCC examinations are criterion-referenced. This means the passing score is based on a predetermined criterion. This criterion is a statistical ability level established by the Content Team based on evaluation of criticality of content and the test questions’ past statistical performance. Questions used to determine pass/fail have proven statistical history that demonstrates the question is appropriate for use to measure an individual’s ability level.

There is no set percentage passing level. **An ability level for each candidate is calculated based on the number of questions they answer correctly (there is no penalty for wrong answers).** Pass/fail is determined based on this ability level as compared to pass/fail standard which is a predetermined ability criterion. When different forms of the examination are used, a process called equating is initiated. This procedure converts all results to a common scale. So someone who takes a slightly more difficult form of the exam will need to answer fewer questions correctly than someone who takes a slightly easier form of the exam.

NCC utilizes the item response theory of psychometrics for the analysis of its examinations. Item response theory (Rasch analysis) is the study of test and item scores based on assumptions concerning the mathematical relationship between abilities and item responses. This is a commonly used system, and such examinations as the NCLEX and other health related certification examinations utilize this type of psychometric analysis.

Test reports identify pass/fail status, and they give feedback on the various content areas of the examination in the form of word descriptors: very weak, weak, average, strong and very strong. No percentages or standard scores are given. These descriptors are based on the items within a given subtest. The overall pass/fail decisions are based on the full test, and the verbal descriptors are intended to provide suggested feedback on strengths and weaknesses in various content areas. Since this feedback is based on relatively few items, general verbal descriptions are given instead of subtest scores. These word descriptors are for information only, and they should be interpreted cautiously due to the small number of items included in each content area.
SAMPLE TEST REPORT

You will receive an official test results report from NCC. Shown below is a sample test result report for a candidate who has passed the examination.

INPATIENT ANTEPARTUM NURSING EXAMINATION

Pass/Fail: PASS

EXAM CONTENT REPORT

The following provides information regarding your performance on the different content areas tested on the examination.

Test reports identify pass/fail status, and they give feedback on the various content areas of the examination in the form of word descriptors: Very weak, weak, average, strong and very strong. No percentages or standard scores are given. These descriptors are based on the items within a given subtest. The overall pass/fail decisions are based on the full test, and the verbal descriptors are intended to provide suggested feedback on strengths and weaknesses in various content areas. Since this feedback is based on relatively few items, general verbal descriptions are given instead of subtest scores. These word descriptors are for information only, and they should be interpreted cautiously due to the small number of items included in each content area.

**When You Pass the Exam**

**Credential**
Your NCC certification status entitles you to use the credential RNC-IAP (Registered Nurse Certified - Inpatient Antepartum Nursing)

**Terms of Certification**
NCC certification is awarded for a period of three years.

The effective date for certification is the date on the official NCC letter that tells you that you have successfully completed the certification process.

---

**Maintaining Your Certification**

- NCC certification must be maintained every three years.
- Certification that is not maintained will expire
- The NCC certification maintenance program allows you to continue your certification status by obtaining specific hours of continuing education credit as defined in your Education Plan, which is generated by your Continuing Competency Assessment (CCA).
- For continuing education credit to be used for certification maintenance it must be earned *AFTER you have taken your Assessment and in the areas defined by your Education Plan* before your maintenance is due.
- The maintenance process includes submitting a maintenance application prior to your maintenance due date with appropriate fees and requested documentation. Using NCC CE modules does NOT automatically maintain your certification. You must submit a maintenance application and pay a maintenance fee in addition to any CE fees.
- Maintenance applications are subject to random audit. If you are chosen for audit, you will be required to upload CE certificates and course descriptions. These records should be maintained during each maintenance cycle, until your maintenance application has been approved. You can upload these documents in your maintenance application throughout your maintenance cycle.

You may apply for maintenance up to 1 year before your maintenance date. As long as you have obtained the required contact hours of continuing education credit—*you do not need to wait until your maintenance deadline to apply*. Maintenance will be due in the quarter in which you were notified of your certification (*not the date on which you took the examination*). Your maintenance due date can be found by signing into your NCC account. Sign into your account using your email and password.

**The NCC website has more detailed information**
For more information about the certification maintenance program and the Continuing Competency Assessment (CCA), click the purple "Maintain your Certification" box.
CONTINUING COMPETENCY ASSESSMENT (CCA)

NCC views certification as a process that functions throughout an individual nurse or nurse practitioner's career. It reflects life-long learning, ongoing professional development and is supported by maintaining specialty knowledge competencies.

The standard process for the NCC Certification Maintenance Program makes use of an assessment tool and resulting personal education plan:

- Complete the continuing competency assessment (CCA) that reflects the current knowledge competencies aligned with your certification specialty at the beginning of each new certification maintenance cycle.

- Earn CE as specified by the education plan developed from your assessment. Your education plan outlines the CE needed to maintain your NCC certification. Only CE earned after you have taken your assessment can be used to maintain your certification. It must address the CE needs as outlined by your educational plan.

This program provides continuing validation that NCC certified nurses and nurse practitioners are maintaining their specialty knowledge competencies based on current practice and examination content.
