The above chart shows the percentage distribution of questions on the Inpatient Obstetric Nursing exam across the major content categories covered on the examination. The major focus of the examination is on labor and birth, and complications of pregnancy with labor and birth having the most emphasis. Less emphasis is on fetal assessment, and recovery, postpartum and newborn care with professional issues having the lowest number of questions assigned.

Expectations for inpatient obstetric nursing is that nurses practicing in this field will have knowledge of caring of pregnant women (after 20 weeks) in the antepartum, intrapartum, postpartum and normal newborn areas.
**EXAM OUTLINE**

Areas of knowledge to be tested on the Inpatient Obstetric Nursing examination are listed in the following outline. This list is not intended as an all-inclusive review of the scope of knowledge of the inpatient obstetric nurse. It is provided only to help certification candidates evaluate their own nursing practice.

Percentages identified for the topic areas represent the number of test questions assigned to each content area. These percentages do not necessarily reflect the content of future examinations.

Focus of the examination will primarily be on the pregnant woman after 20 weeks of gestation through discharge.

ASSOCIATED COMPETENCIES

- Demonstrate knowledge of biological, physiological, psychological, and sociocultural factors that influence the pregnant family, developing fetus, and newborn.

- Identify alterations in the biological, physiological, psychological and sociocultural status of the mother/fetus and newborn.

- Identify patient’s actual or potential problems/needs utilizing information received from the patient, the family, appropriate records and other health team members.

- Describe a comprehensive plan for individualized nursing care, including diagnostic, therapeutic and patient educational components.

- Apply current standards of practice, research findings and ethical/legal principles in providing nursing care to the normal and high risk antepartal, intrapartal and postpartal family.
STUDY GUIDE

COMPPLICATIONS OF PREGNANCY

I. Maternal Complications Affecting the Fetus and Newborn

- Hypertension
  - Gestational
  - Preeclampsia-eclampsia
  - Protein-creatinine levels
  - HELLP syndrome
  - Chronic
- Diabetes
  - Preexisting (Type I and Type II)
  - Gestational
  - Diabetic Ketoacidosis
- Maternal cardiac disease/anomalies
- Maternal pH
- Acid-Base Status
- Infectious diseases
  - Sexually transmitted infections
    - Chlamydia
    - Gonorrhea
    - Herpes
    - HIV infection
    - Human papilloma virus
    - Syphilis
  - Non-sexually transmitted infections
    - Viral infections (e.g. influenza, zika, COVID)
    - Bacterial infections (e.g. group B Streptococcus)
- Antivirals
- Hematologic disorders
  - Anemia
  - Thrombocytopenia
  - Hemolytic disease
  - Disseminated intravascular coagulation (DIC)
  - Thrombophilia
- Respiratory Disorders
  - Asthma
- Acute fatty liver
- Obesity
  - Bariatric surgery
- Hyperthyroidism/hypothyroidism
- Systemic lupus erythematosus
- Cholelithiasis
- Cholestasis
- Rh incompatibility
- Hyperemesis gravidarum
- Genetics

II. Maternal Psychosocial & Environmental Factors

- Life-style
- Anxiety and treatment
- Substance use/abuse
  - Alcohol
  - Tobacco/Nicotine
  - Drugs
    - Cocaine
    - Subutex/Suboxone
    - Over the counter/prescription
    - Heroin
    - Methadone
    - Methamphetamine
    - Marijuana
    - Fentanyl
  - Other Drugs/Substances
- Abuse/Intimate Partner Violence
- Environmental
  - Toxic waste
  - Mercury
  - Lead

III. Preterm Labor

- Definition
- Risk Factors
- Diagnostic Criteria
- Predictive Factors
- Tocolysis
- Management
  - Magnesium sulfate
  - Neuro protection
- Fetal and neonatal complications
- Antenatal steroids

IV. Multiple Gestation

- Definition
- Risk factors
- Management
- Fetal and neonatal complications

V. Placental Disorders

- Placental Abruption
- Placenta Previa
- Abnormal implantation
- Vasa Previa
- Placental Insufficiency
- Uterine Rupture
- Placenta Accreta
Fetal Assessment

I. Antenatal Testing

- Ultrasound
- Assessment of fetal growth
- Non-stress testing
- Biophysical and Modified Biophysical Profile
- Amniocentesis
- Percutaneous Umbilical Cord Sampling (PUBS)/Cordocentesis
- Quad screen test (AFP+, multiple marker screening)
- Intrauterine Transfusion (IUT)
- Umbilical artery doppler flow studies

II. Electronic Fetal Monitoring

- Fetal Heart Assessment
  - NICHD Terminology
    - Category I, II and III
    - Baseline Features
    - Rate
    - Variability
    - Dysrhythmias
    - Artifact
- Signal ambiguity
- Accelerations
- Decelerations
- Uterine Activity
  - Normal
  - Hypertonus
  - Tachysystole
- Sinusoidal Pattern
- Intrauterine Resuscitation

III. Non-Electronic Monitoring

- Auscultation
- Palpation

IV. Acid-Base Interpretation

- Cord blood gas evaluation
- Fetal stimulation
  - Vibroacoustic
  - Scalp
I. Physiology of Labor
- Characteristics of true labor
- Uteroplacental physiology
- Maternal physiology

II. Assessment and Management of Labor
- General Assessment
  - Physical assessment (initial/ongoing)
    - General
    - Abdominal
    - Vaginal
  - Psychosocial
- Stages of Labor (First, Second, Third)
  - Characteristics
  - Support interventions
  - Nursing responsibility
- Labor Curves

III. Obstetrical and Perioperative Procedures
- Cervical Ripening
  - Pharmacologic
  - Nonpharmacologic
- Version
  - Indications and contraindications
  - Complications
  - Nursing responsibilities
- Episiotomy
  - Indications and contraindications
  - Complications
  - Nursing responsibilities
- Forceps/vacuum extraction
  - Indications and contraindications
  - Complications
  - Nursing responsibilities
- Cesarean birth
  - Indications and contraindications
  - Types
  - Complications
  - Post-anesthesia care
  - Nursing Interventions/support
  - Vaginal prep prior to Cesarean
- Vaginal Birth after Cesarean Birth (TOLAC)
  - Indications and contraindications
  - Complications
  - Nursing interventions/support
- Vaginal Breech deliveries
- Tranexamic acid
- Uterine artery embolization
- Massive transfusion protocol
- Amnionfusion

IV. Pain Management and Coping
- Non-pharmacologic methods
  - Relaxation
  - Breathing
  - Positioning
  - Coaching
  - Prepared childbirth
  - Hydrotherapy
  - Peanut Ball
  - Birthing Ball
- Pharmacological methods
  - Systemic
    - Nitrous Oxide
    - Narcotics
    - Sedatives
  - Regional
    - Epidural
    - Spinal
    - Combined spinal & epidural
    - Complications
- General Anesthesia
  - Complications
  - Maternal
  - Fetal
- Nursing responsibilities

V. Labor and Obstetric Complications
*(Nursing management/ intervention)*
- Dysfunctional labor (Dystocias)
  - Prolonged
  - Precipitous
  - Maternal implications
  - Fetal-neonatal implications
- Malposition or malpresentation
  - Shoulder dystocia
    - Nursing interventions
    - Maternal/Fetal implications
- Problems associated with umbilical cord
  - Velamentous cord insertion
  - Prolapsed cord
- Problems associated with Amniotic Fluid
  - Polyhydramnios
  - Oligohydranmios
- Rupture of membranes
  - Prelabor (preterm)
  - Term
  - Post term
- Amniotic fluid embolism (Anaphylactoid syndrome of pregnancy)

- Chorioamnionitis
- Obesity
- Hemorrhage
  - Balloon catheters
- Maternal morbidity and mortality
- Prolonged Pregnancy
  - Definition/risks
  - Management
  - Fetal and neonatal complications

VI. Induction and Augmentation
- Induction of labor/Cervical Ripening
  - Indications and contraindications
  - Cervical Readiness (Bishop Score)
  - Methods
    - Amniotomy
    - Oxytocin Infusion
    - Prostaglandins
    - Mechanical (e.g. Balloon Catheter)
- Nursing management and interventions
- Fetal and neonatal complications
I. Recovery and Postpartum Physiology and Complications

- Physiological changes
  - Reproductive system
  - Other organ systems

- Nursing care of the postpartum woman
  - Rh immune globulin
  - Involution
  - Pain Management
  - Perineal assessment
  - Wound care

- Postpartum Complications
  - Infection
  - Bleeding
    - Lacerations
    - Hemorrhage
    - Retained placental fragments
    - Hematoma
    - Nursing Interventions
    - Thromboembolic
      - DVT
    - Pulmonary Embolism
    - Cardiomyopathy
    - Psychological
    - Post birth warning signs
    - Other medical/obstetrical conditions

II. Family Dynamics and Discharge Readiness

- Psycho/Social Cultural
- Parent Infant interactions
- Discharge planning and home care
- Contraception
- Patient education
  - Maternal self-care
  - Warning signs
  - Routine neonatal care
- Perinatal loss
  - Bereavement/Grief

III. Lactation and Infant Nutrition

- Lactation
  - Physiology of lactation
  - Nutritional needs of lactating woman
  - Breast feeding techniques
  - Complications
  - Contraindications to breastfeeding
  - Care of the non-breastfeeding mother
- Infant Nutrition
  - Feeding
  - Problems/complications
IV. Newborn Physiology and Complications

- Adaptation to Extrauterine Life (Transition)
  - Respiratory changes
  - Cardiovascular changes
  - Skin to skin

- Thermoregulation
  - Glucose homeostasis and fluid balance

- Newborn Assessment
  - Physical
    - Abnormal findings
    - Common congenital anomalies
    - Common skin lesions or rashes
    - Neural tube defects
    - Intrauterine Growth Restriction (IUGR)
    - Small for Gestational Age (SGA)
  - Laboratory evaluation
    - Thrombocytopenia
    - WBC count
    - Anemia
    - Polycythemia
    - ABO incompatibility

- Neurological
  - Tone
  - Reflexes

- Behavioral states
  - Gestational age
  - Late preterm infants

- Newborn Resuscitation
  - Initial evaluation
  - Personnel and equipment
  - Indications and techniques
  - Indications for transport

- Complications (Initial Assessment/Nursing Interventions)
  - Respiratory and cardiovascular emergencies
  - Jaundice
  - Surgical Emergencies
  - Infectious diseases
    - Group B Streptococcus
    - E-coli
    - Hepatitis
    - Varicella
    - Common sexually transmitted infections
  - Birth injuries/trauma
    - Cephalohematoma
    - Caput succedaneum
    - Fractures
    - Nerve injury
  - CHD screening
    - Infant affected by substance abuse
    - Neonatal abstinence
    - Neonatal withdrawal
    - Alcohol
  - Infant of diabetic mother (IDM)
STUDY GUIDE

PROFESSIONAL PRACTICE ISSUES

Legal Issues
• Professional Regulation
  -Practice
• Staffing issues
• Legal liability
  -Consent
  -Documentation/medical records
  -Negligence/malpractice

Ethical Principles
• Autonomy
• Beneficence
• Nonmaleficence
• Justice

Patient Safety
• Communication
• Interprofessional practice

Quality Improvement/Evidence based practice
• Research Terminology
  -Reliability
  -Validity
  -Significance
  -Levels of Evidence
• Research utilization
• Perinatal Core Measures
