Congratulations on taking the next step in your career – earning your certification and C-NNIC certification!

**Information Included:**

- Fees & General Policies 2-5
- About the Exam 6
- Examination Content 7-9
- Study Guide & Resources 10-15
- Sample Questions 16
- Scoring 17
- Test Report 18
- Terms of Certification and Certification Maintenance 19

**About This Guide**

This guide lists fees and provides information that will help candidates prepare for the examination. It includes the exam content in outline form, competency statements and study guide. It also provides sample exam questions to familiarize the test taker with question format, study resources and lists some of NCC administrative policies & procedures. It is recommended that candidates familiarize themselves with the information in this guide.

NCC examinations are offered in several different test administrations options. The NCC publication *Guide to Testing Methods* will explain the different rules and policies based on how the candidate is taking the examination. Please download this publication from the NCC website and review the exam administration options. It will answer any questions about the NCC examination process.

If there are other questions, please feel free to contact NCC through the “Contact Us” page at NCCwebsite.org.

**NCC’s Philosophy of Testing**

Certification is an evaluative process that provides the opportunity for health care professionals in the obstetric, gynecologic and/or neonatal specialty to demonstrate publicly what they know and to be recognized for the special knowledge they possess. The NCC certification carries no licensing authority. The ability to practice as a health care professional is regulated by the state, and while certification may be required in some states for specific health care roles, NCC has no regulatory power to require states to recognize NCC certification for this purpose. Practice and educational standards are reflected in the certification process, but the responsibility for development of such standards rests with the professional specialty organizations and the educational community. NCC encourages individual to seek out information about how certification relates to licensure requirements, program accreditation of the educational institutions attended, the educational and practice standards of national specialty organizations, and employment expectations.

**This Exam's Purpose**

The purpose of the Neuro-Neonatal Intensive Care Subspecialty Certification is to provide a competency-based examination that tests specialty knowledge and the application of that knowledge for licensed health care professionals in the US and Canada, who provide neurological care to at-risk or impaired neonates within an intensive care environment to improve overall outcomes.

**It is Important to Read the Information in This Guide. It Explains All Policies to Which Candidates Will be Subject.**
NO REFUNDS WILL BE CONSIDERED FOR ANY CANDIDATE

- who has taken an examination
- who is not successful in achieving certification
- who failed to take the exam at a Test Center or via Live Remote Proctoring (LRP) within the 90-day testing window and did not submit a change request within stated time frames
- who failed to schedule an appointment to test within the first 30 days of their 90-day eligibility window and is unable to schedule their exam within their eligibility window.
- who failed to have proper ID or meet any required rules
- who failed to login to the test portal or appear at the test center (no-show) or who signed in late to the test portal or arrived late to the test center
- who failed to take a scheduled exam for any reason (illness, quarantine, accident, death, etc.)

EXAMINATION AND RELATED FEES

EXAMINATION FEES*
Test Center and Live Remote Proctoring (LRP) Computer Exam Fees are $210 which includes the non-refundable $50 application fee.

*Examination fees are subject to change.

CANCELLATION: 6 HOUR WINDOW
Candidates have six hours from the time the submit an exam application to cancel the exam. The order can be canceled by logging into the account and clicking on “Cancel Application” found under the new certification. Only the candidate can cancel the application and they must meet the 6-hour window. After the six hours they must withdraw or pay for a change.

CHANGE REQUEST
Candidates who cannot take their currently scheduled examination, have missed their testing date or need to take a different exam - can request a change for a fee of $125. Details are on the NCC website.

WITHDRAWAL FEE
A Testing Center or LRP testing candidate who withdraws from testing is subject to a $165 withdrawal fee. The candidate will receive $160 of their $325 payment, minus any outstanding charges. Bulk Purchase Voucher candidates cannot withdraw.

RETEST FEE
Retest candidates must pay full application and examination fees. There are no discounts and they must complete a 90-day wait period* before resubmitting an application for testing. (*see Retest Policy page 4). Certification exams of the same specialty can only be taken TWICE in a calendar year for the same candidate. Candidates must submit a new application and again demonstrate eligibility and licensure.

SUBSTITUTION FEE
Candidate substitutions are not allowed for any reason.

THIRD PARTY PAYMENTS
Applicant fees paid by third parties will be refunded to the third party in accordance with stated refund policies, in the event the applicant is determined ineligible or withdraws within the specified time. Vouchers are nonrefundable.

Test Date Change
Test Center and Live Remote Proctoring (LRP) exam candidates can change their scheduled testing date to another date within their window once for free.

Candidates must handle this directly with PSI/AMP.

Refer to the NCC testing guide for details.
**PAYMENT INFORMATION**

- All applications are subject to a nonrefundable application fee.
- All fees are nonrefundable except where otherwise noted.
- Payments can be made by credit card (Visa, American Express and MasterCard only). NCC does not accept debit cards or split payments (part check and part credit card).
- Payments can be made by e-check: bank routing number and account number required.
- For payments made by third parties, any refund will be issued to the third party and not to the applicant. Vouchers are nonrefundable.
- All payments must be in US funds.
- Exam fees can only be submitted online at the NCC website. Applications will not be accepted by mail, phone or fax.
- NCC will accept group payments for certification exams from institutions. Details are on the NCC website under Bulk Purchases.

**OTHER NON-REFUNDABLE PAYMENT RELATED FEES**

**INCOMPLETE APPLICATION FEE**
All incomplete applications are subject to a non-refundable $30 reprocessing fee upon the submission of proper documentation. Incomplete applications are those submitted with missing information, (e.g. required licensure information and corroborating uploaded documentation; containing incomplete or incorrect information; or do not include full fee payment).

**RETURNED CHECKS AND CREDIT CARD CHARGEBACK FEE**
A $30 fee will be assessed for any check or e-check returned or a credit card payment disputed for any reason. Remittance thereafter of all fees and applications must be in the form requested by NCC.

**LICENSE VERIFICATION**
If licensure information is requested requiring an additional submission, the candidate will have two weeks to provide the license with all the correct information and pay the non-refundable $30 reprocessing fee. If this is not provided within the two weeks, the application will be marked ineligible. Ineligible applicants will receive a refund minus the $50.00 non-refundable application fee. There are no refunds or withdrawals for applications using a bulk code.

**VERIFICATION OF CERTIFICATION**
Third party notification of status will NOT be released without authorization from the certified individual. A $30 fee is required for any third-party notification or issuance of duplicates of test results reports. Verification requests can only be submitted after official results with score report have been uploaded to the candidate’s NCC account.

Verification requests can only be made via the online verification system on the NCC website. NCC does not issue verifications via the mail or fax.

Certification will be revoked or withheld if a returned check or a chargeback request on a credit card payment results in loss of income to NCC and the monies are not recovered in an alternate payment. Fees received at any time will first be applied to any unpaid prior certification/special fees.
UNSUCCESSFUL CANDIDATES
A candidate who sits for the examination and does not receive a passing score is not eligible for any refund nor for any credit on any later NCC exam.

NONDISCRIMINATION
It is the policy of NCC that no individual will be excluded from the examinations as a result of age, sex, race, religion, national origin, ethnicity, disability, marital status, sexual orientation, military status or gender identity.

AMERICANS WITH DISABILITIES ACT
Special testing accommodations will be provided pursuant to the Americans with Disabilities Act. Any requests for special testing accommodations must be made in writing and submitted with the application. The accommodation request form can be downloaded from the NCC website. Upon receipt of a request for special accommodations, NCC will contact the applicant. Such requests must be signed by a clinician, physician, or other qualified specialist with training and experience appropriate to diagnose and treat the specified disability.

GENERAL POLICIES

EXAM CATEGORY CHANGES
Candidates can only request an exam category change by completing a Change Request Form on the NCC website and submitting with non-refundable payment of $125. Candidates are only allowed one change request (e.g. After a change request is submitted no other change request can be submitted). All change requests must be approved by NCC. There will be no refund of original or Change Request fees. Eligibility must be re-established for the new exam category, and additional documentation and fees may be required. The time to consider eligibility for the new category will count toward the original assigned 90-day testing window.

Examination category cannot be changed from a subspecialty or RN Core application to a NNP or WHNP certification. Examinees must take the exam for which they have been determined eligible. No changes will be permitted on examination day. If a candidate knowingly or unknowingly takes an examination other than the one they were found eligible to take, the examination will not be scored. No refunds will be allowed, and all fee policies will apply if the candidate reapplies for an examination. See website for complete details.

RETEST POLICY
Candidates may retake the examination if they do not pass. They must reapply 90 days after the test was taken, submit all applicable fees and documentation, and re-establish eligibility according to the appropriate deadlines. There is no limit to the number of times a candidate may retake the examination. However, the maximum number of times a candidate can take the same NCC test in a calendar year is two.

All retest candidates must wait 90 days from the date their exam was taken before they can submit a new application to retest.
• this date is provided in the candidate’s results notification
• this 90-day wait period affects all modes of testing

Any loss of power or internet during an exam in which there was more than 15 minutes of testing with exposure to more than 10% of the exam requires a retest at a Test Center. Candidates will have to wait 90-days before they can reschedule and they must follow NCC’s retest policy. A decision on the timing of a second attempt will be made after NCC reviews the test exposure. There is no need to complete a new application, but candidates MUST notify NCC of the internet disconnection issue as soon as computer access is available.

If a retest application is submitted prior to the 90-day wait period, the application will be returned as ineligible. The applicant will be subject to the $50 non-refundable application fee.
REVIEW COURSES AND MATERIALS
NCC does not offer or sponsor review courses or review materials for its certification examinations. Examination candidates should view any course of study as being independent of NCC. Candidates should carefully examine the merits of any individual exam preparation offering before participating.

TEST DISCLOSURE
NCC does not make test questions available for review. Because test questions may be used for more than one examination administration, distributing this information would compromise the security of the test questions and would increase the cost of certification if the questions had to be replaced each year.

REVOCATION
Your certification may be revoked for falsifying any information submitted to determine eligibility to take the certification examination or for maintaining certification, for losing your license to practice, or for failing to pay designated certification or maintenance fees.

GENERAL POLICIES (CONTINUED)

INTERNET DISCONNECTIONS
If the candidate has started the exam and is disconnected, please use the PSI tech lines if testing with LRP or if at a Test Center discuss immediately with the proctor to attempt to get reconnected and continue testing.

If the candidate is unable to get reconnected after starting the exam, the timing for a second attempt to take the exam will be based on how much time and how many questions they were exposed to. If a candidate is disconnected and cannot be reconnected and has tested for under 15 minutes and were exposed to less than 10% of the exam they may be able to reschedule within their current eligibility window. Candidates must work directly with PSI that day to reschedule and if they run into any issues they must notify NCC within 3 days of testing. If a candidate tests for longer than 15 minutes and/or saw more than 10% of the questions on the exam they will have to wait 90 days before they can reschedule, and they must follow NCC’s retest policy. A decision on the timing of a second attempt will be made after NCC reviews the test exposure. Please note, candidates will need to retest at a Test Center. Please notify NCC of the internet disconnection issue as soon as computer access is available.

APPEALS PROCEDURE
Any request to waive any policy of the NCC Board of Directors relative to eligibility, administration, examination content issues, or certification maintenance must be received in writing within 60 days of the dispute. All requests should be sent to the attention of the NCC President at nccpresident@nccnet.org. The correspondence should contain a detailed account as to why the NCC policy should be waived or the candidate’s status should be changed. Such requests are referred to the NCC Policy Review Committee of the Board of Directors. All decisions will be provided in writing. Cases not resolved by the Policy Review Committee will be referred to the full Board of Directors.

DESIGNATION AUTHORIZATION
Certification is a non-transferable, revocable, limited, non-exclusive license to use the certification designation “C-NNIC”, subject to compliance with the policies and procedures, as may be revised from time to time.

Any use or display of NCC certification marks and/or logos without the prior written permission of the NCC is prohibited. Any candidate or certificant who manufacturers, modifies, reproduces, distributes or uses a fraudulent or otherwise unauthorized NCC certificate, NCC designation or other credential may be subject to disciplinary action, including denial or revocation of eligibility or certification. Any individual who engages in such behavior also may be subject to legal action.

POLICIES ARE SUBJECT TO CHANGE WITHOUT NOTICE.
ABOUT THE EXAM

TIMED EXAMINATION
Two (2) hours are allotted to complete the examination.

EXAM FORMAT
The Neonatal Neuro-Intensive Care examination consists of up to 125 test questions. 100 are scored and the remainder are embedded in the exam as pretest items. The pretest items do not count toward the examinee’s final results.

- There is one question format used for all NCC examinations.
- Each question has a premise (stem) and three alternative answers.
- The answer options are alphabetized by the first word in each answer option to randomize the answers.
- Tests are delivered in a different random order for each candidate.
- Questions will test both basic knowledge and application of knowledge.
- Questions that contain laboratory data will show results in conventional units of measure with international units in parentheses.
- Drugs are listed in both generic and trade names where appropriate.

EXAMINATION CONTENT DEVELOPMENT

The development of NCC certification involves many individuals and involves a meticulous process of review. There are three major groups that contribute to the test development process:

ITEM WRITERS:
MDs, RNCs, APRNs, Respiratory Therapists and others identified with special expertise have the responsibility of drafting test items per designated assignment for review by the content team and expert reviewers. Item writers are solicited from the NCC certified population, by recommendations or through the volunteer portal.

REVIEWERS:
Reviewers are MDs, RNCs, APRNs, Respiratory Therapists or other designated experts who assist the content teams in review of test items developed by the item writers. Reviewers are responsible for reviewing items for content relevance and confirming that references cited for the questions support the items as written.

CONTENT TEAMS:
Content team members are experienced practitioners and are appointed on an annual basis by the NCC President. Content teams are solicited from the NCC certified population, by recommendations or through the volunteer portal. To see the current membership composition of the Content Team responsible for Neonatal Neuro-Intensive Care examination, please visit the NCC website under the section on NCC Leadership.

Content team members are MDs, RNCs, APRNs, Respiratory Therapists or other identified experts who:
- develop and update the test outline and competency statements
- review test items developed by item writers
- review item statistics from exam administrations and pretest examinations
- approve the exam forms to be administered
- review item banks

In addition, NCC uses volunteers for standard setting and content validation studies/job analysis studies.
The chart shows the percentage distribution of questions on the Neonatal Neuro-Intensive Care exam across the major content categories covered on the examination.
## EXAMINATION CONTENT

**EXAM OUTLINE**

Areas of knowledge to be tested on the Neonatal Neuro-Intensive Care examination are listed in the following outline. This list is not intended as an all-inclusive review. It is provided only to help candidates evaluate their own practice.

Percentages identified for the topic areas represent the number of test questions assigned to each content area. These percentages do not necessarily reflect the content of future examinations.

EXAMINATION CONTENT

ASSOCIATED COMPETENCIES

- Identify antepartum and intrapartum indicators of neurological risk and their implications to the fetus and neonate.
- Systematically assess neonatal neurological status utilizing clinical neurological assessment skills and neuroimaging to differentiate abnormal from normal.
- Utilize and interpret bedside neuro-monitoring tools to identify alterations in cerebral function and perfusion and implement appropriate interventions.
- Apply knowledge of the pathophysiology of neurologic injuries in the neonate including risk factors, presentation, and outcomes to implement diagnostic, therapeutic interventions and plan of care.
- Develop an individualized plan of care for the prevention, maintenance and promotion of health for neonates at risk or those with neurological injuries or dysfunction to improve overall outcomes.
- Utilize knowledge of neurosensory development, pain and stress pathways and implement evidence based strategies to minimize adverse outcomes in the at risk neonate.
- Through ongoing communication with the family, evaluate discharge needs, psychosocial behavioral states and the social determinants of health and modify the plan of care in collaboration with other health care providers.
- Identify professional, legal and ethical issues that present when caring for neonates at risk for neurological injury or dysfunction.
STUDY GUIDE

NEUROLOGIC DEVELOPMENT AND EVALUATION OF THE FETUS AND NEWBORN

I. Physical, Gestational Age, Behavioral and Neurologic Assessment

- Critical periods of fetal CNS and sensory development
  - Synaptogenesis
  - Organization
  - Migration
  - Myelination
  - Pruning
  - Apoptosis
  - Overproduction

II. Antenatal and intrapartum indicators of neurological risk to the fetus and neonate

- Maternal risk factors to fetal CNS development
  - Genetic predisposition
  - Maternal health
  - Placental health
  - Toxin exposure
  - Infection

- Neurological risks to the fetus and neonate during labor and delivery, stabilization and resuscitation and transition
  - Perinatal emergencies
  - Ineffective resuscitations
  - Equipment issues
  - Preterm labor and delivery

III. Comprehensive neurological exam identifying normal and abnormal findings

- Comprehensive neurological exam at all gestational ages
  - Head
    - Size
    - Shape
    - Sutures
  - Cranial Nerves
  - Neonatal reflexes
    - Deep tendon reflex
  - Tone
  - Posture
  - Movement
  - Level of consciousness

- Impact of pharmacological agents on the neonatal neurological exam
  - Benzo
  - Opioids
  - Maternal drugs
    - SSRI
    - Magnesium sulfate

- Abnormal findings
  - Dysmorphic features
  - Hair tufts
  - Dimples
  - Birth marks
  - Head
    - Cephalohematoma
    - Subgaleal hematoma
    - Caput
I. Neuromonitoring, Recognition of and General knowledge of EEG/aeEG

- Cerebral monitoring
  EEG/aeEG/NIRS
   - clinical use
   - limitations
   - artifact

- Clinical Indications and significance of normal and abnormal findings of EEG/aeEG

  Background patterns
  Seizures

- Patient care needs during neurological monitoring
  Skin assessment and protection
  Event marking

III. Use of Neurologic Imaging to assess and modify treatment and evaluate prognosis

- Clinical indications of neuro imaging

- Identification of anatomical structures and recognition of significant neuro-imaging findings

  Intraventricular hemorrhage (IVH)
  Periventricular leukomalacia (PVL)
  Posthemorrhagic Hydrocephalus (PHH)
  Hypoxic Ischemic Encephalopathy (HIE)
  Stroke
  Intracerebral hemorrhage (ICH)
  subdural hemorrhage
  Subgaleal hemorrhage
  Congenital brain malformations

- Patient care needs during neurological imaging
  Skin protection
  Off unit transport
**STUDY GUIDE**

**ASSESS AND MANAGE PATHOPHYSIOLOGIC STATES SPECIFIC TO NEUROLOGICALLY COMPROMISED OR AT RISK NEONATES AND PROVIDE NEUROPROTECTION**

I. Pathophysiology of neurologic Injuries  
*For all injuries: incidence, etiology, clinical presentation, diagnostics, lab studies, treatments*

- Hypoxic Ischemic Encephalopathy (HIE)  
  Mechanism of injury  
  Multisystem organ failure

- Neonatal stroke  
  Arterial  
  Cerebral Sino-venous thrombus (CSVT)

- CNS Malformation  
  Anatomical  
  Vascular  
  Congenital hydrocephalus  
  Neural tube defects

- Cranial deformities  
  Plagiocephaly  
  Craniosynostosis

- CNS infection  
  Viral  
  -HSV  
  -CMV  
  -Zika  
  Bacterial

- Encephalopathy  
  Metabolic/endocrine  
  -Hypoglycemia  
  -Inborn errors of metabolism  
  -Bilirubin  
  Hepatic  
  -Neonatal hemochromatosis  
  -Hemophagocytic lymphohistiocytosis (HLH)

- Genetic

- Neonatal drug exposure  
  Neonatal abstinence syndrome (NAS)  
  Iatrogenic

- Neuromuscular disease  
  Spinal muscular atrophy (SMA)  
  Congenital myopathies

- Premature neonate  
  Intraventricular hemorrhage (IVH)  
  Periventricular leukomalacia (PVL)  
  Posthemorrhagic Hydrocephalus (PHH)

- Birth injuries  
  Subgaleal hemorrhage  
  Brachial plexus

II. Prevention, Management and Maintenance of health for at risk neonates or those with neurologic injury

- Eligibility, contraindications and interventions to initiate therapeutic hypothermia (passive or active), maintaining treatment and rewarming  
  Perinatal risk factors  
  Encephalopathy staging  
  Interpretation of cord gas  
  Fluid and electrolyte and nutrition  
  Complications

- Recognition and management of seizures  
  Types  
  Subclinical/clinical  
  Phenobarbital

- Recognition and management of apnea  
  Prematurity  
  Central

- Interventions to prevent or minimize brain injury  
  Positioning  
  Delayed cord clamping  
  Maternal and neonatal pharmacological agents  
  Stabilize and maintain appropriate physiologic parameters  
  Optimize ventilatory strategies  
  Protected sleep

- Prevention of infection and systemic inflammation  
  Central line-associated bloodstream infection (CLABSI)  
  Necrotizing enterocolitis (NEC)
I. Apply knowledge of neurosensory environmental experiences

- Neurosensory environmental experiences
  - Auditory
  - Visual
  - Vestibular
  - Olfactory
  - Tactile
- Therapeutic positioning
  - Neutral body alignment
  - Appropriate containment
  - Swaddle
  - Skin-to-skin
- Protected sleep
  - Environment of care
  - Maturation of sleep cycles
  - Negative effects of sleep deprivation
- Thermoregulation
  - Temperature instability
  - Consequences of hypo/hyperthermia
- Nutrition
  - Special considerations

II. Describe and manage stress and pain pathways and the impact on behavioral and physiological parameters

- Neurobehavioral development
  - Habituation
  - Motor organization
  - State organization
- Pain assessment
  - Special considerations for the neurologically compromised
  - Pain reassessment
- Neonatal pain management
  - Pharmacologic
  - Non-pharmacologic
- Stress response
  - Hormones and neurotransmitters
  - HPA axis
  - Stress cues
  - Toxic stress

III. Collaborate with health care providers to assess and manage psychosocial behavior states and evaluate social determinants of health, modify the plan of care and prepare for discharge

- Family centered care and integrations
  - Partnered care
  - Parental-neonatal attachment
  - Stress and separation
  - Participation in decision making and daily caregiving
  - Culturally and spiritually sensitive care
- Discharge/preparation/process
  - Developmental follow up
  - Specially follow up
  - Hearing screening
  - Family support
  - Teaching
    - SIDS prevention
    - Motor, cognitive and language delays
- End of life care/ palliative care/ grieving process
  - Non-initiation
  - Comfort care
  - Hospice
I. Identify professional and ethical issues in the care of neonates at risk or with neurological injury or dysfunction

- Evidence based research
- Risks and outcomes
- Benchmarking
- QI/process improvement
- Best practice guidelines and bundles
- Translocation science

- Professional practice
  - Communication
  - Teamwork
  - Continuity of care
  - Patient safety
  - Education and training
  - Compassion fatigue
  - Self-care

- Ethical and legal issues that impact the neurologically impaired neonate
- Life limiting conditions
• Blackburn, Maternal, Fetal, & Neonatal Physiology, Elsevier, 2018
SAMPLE QUESTIONS

NEONATAL NEURO-INTENSIVE CARE

SAMPLE QUESTIONS

Listed below are five sample questions to acquaint the candidate with the test question format. These questions do not reflect the scope or the difficulty level of the questions on the actual examination. The reference from which each question is derived is also cited. However, other references might substantiate a different answer, and the answer shown here might be substantiated by other references.

The rigorous review to which actual test questions are subject is not applied to these sample questions. The focus that should be attended to in reviewing these items is format, not content.

1. A very low birth weight neonate is at increased risk for germinal matrix hemorrhage due to
   A. decreased cerebral arterial blood flow
   B. fragility of the germinal matrix
   C. increased blood-brain barrier
   Answer: B

2. What is the preferred imaging technique for the routine follow-up of ventriculomegaly?
   A. computerized tomography
   B. magnetic resonance imaging
   C. ultrasound
   Answer: C

3. A neonate term neonate with hypoxic ischemic encephalopathy developed seizures at 24 hours of life. What is the first line agent for treatment?
   A. Diazepam
   B. Phenobarbital
   C. Phenytoin
   Answer: B

4. A term neonate with prenatal history of polyhydramnios has no suck and no gag after a routine vaginal delivery. What cranial nerves should be evaluated?
   A. III
   B. VII
   C. IX
   Answer: C

5. A 10-day-old 28-week-gestational-age neonate has had repeated heel sticks for labs, and now demonstrates pain behavior when the heel is being touched gently by the mother. The explanation for this response is
   A. conditioning
   B. habituation
   C. hyperalgesia
   Answer: C
HOW EXAMS ARE SCORED

NCC examinations are criterion-referenced. This means the passing score is based on a predetermined criterion. This criterion is a statistical ability level established by the Content Team based on evaluation of criticality of content and the test questions’ past statistical performance. Questions used to determine pass/fail have proven statistical history that demonstrates the question is appropriate for use to measure an individual’s ability level.

There is no set percentage passing level. An ability level for each candidate is calculated based on the number of questions they answer correctly (there is no penalty for wrong answers). Pass/fail is determined based on this ability level as compared to pass/fail standard which is a predetermined ability criterion. When different forms of the examination are used, a process called equating is initiated. This procedure converts all results to a common scale. So someone who takes a slightly more difficult form of the exam will need to answer fewer questions correctly than someone who takes a slightly easier form of the exam.

NCC utilizes the item response theory of psychometrics for the analysis of its examinations. Item response theory (Rasch analysis) is the study of test and item scores based on assumptions concerning the mathematical relationship between abilities and item responses. This is a commonly used system, and such examinations as the NCLEX and other health related certification examinations utilize this type of psychometric analysis.

Test reports identify pass/fail status, and they give feedback on the various content areas of the examination in the form of word descriptors: very weak, weak, average, strong and very strong. No percentages or standard scores are given. These descriptors are based on the items within a given subtest. The overall pass/fail decisions are based on the full test, and the verbal descriptors are intended to provide suggested feedback on strengths and weaknesses in various content areas. Since this feedback is based on relatively few items, general verbal descriptions are given instead of subtest scores. These word descriptors are for information only, and they should be interpreted cautiously due to the small number of items included in each content area.
SAMPLE TEST REPORT

Candidates will receive an official test results report from NCC. It will be located in your NCC account. Shown below is a sample test result report for a candidate who has passed the examination.

NEONATAL NEURO-INTENSIVE CARE EXAMINATION

Test Results

NAME
ADDRESS

Pass/Fail: PASS

Maintenance Due Date:

Your credential is designated as: C-NNIC (Certified - Neonatal Neuro-Intensive Care)

EXAM CONTENT REPORT

Overall pass/fail decisions are based on your overall exam performance. A candidate must obtain a score equal to or higher than the “passing score” to pass the exam. A candidate’s performance on the examination is not compared to the performance of others taking the examination.

In addition, the test report provides you with feedback on the various content areas of the examination in the form of word descriptors: Very Weak, Weak, Average, Strong and Very Strong. No percentages or standard scores are given. These descriptors are based on items within a given subtest and are intended to provide suggested feedback on strengths and weaknesses in various content areas. Since this feedback is based on relatively few items, general verbal descriptions are given instead of subtest scores. Word descriptors for scoring are set using these ability levels and utilize equal intervals of scale above and below the pass point to provide additional feedback. See the Important Facts and Information on Test Results and Scores page for more detail. These word descriptors are for information only, and they should be interpreted cautiously due to the small number of items included in each content area.

Terms of Certification and Certification Maintenance

After Passing the Exam

Credential
Successfully completing the Neonatal Neuro-Intensive Care exam entitles you to use the credential C-NNIC (Certified – Neonatal Neuro-Intensive Care).

Terms of Certification
NCC certification is awarded for a period of three years.

The effective date for certification is the date on the official NCC score report letter that shows a passed examination.

Maintaining Certification
- NCC certification must be maintained every three years.
- Certification that is not maintained will expire.
- The NCC certification maintenance program allows you to continue your certification status by obtaining 15 hours of continuing education credit.
- For continuing education credit to be used for certification maintenance it must be earned between the date of your notification of certification and the date your maintenance is due.
- The maintenance process includes submitting a maintenance application prior to the maintenance due date with appropriate fees and requested documentation. All CE must be in Neonatal Neuro-Intensive Care. Using NCC CE modules does NOT automatically maintain your certification. Individuals must submit a maintenance application and pay a maintenance fee in addition to any CE fees.
- Maintenance applications are subject to random audit. If an individual is chosen for audit, they will be required to upload CE certificates and course descriptions. These records should be maintained during each maintenance cycle, until the maintenance application has been approved. Individuals can upload these documents in their maintenance application throughout their maintenance cycle. Documents from NCC modules are already on file with NCC and therefore are not requested or audited.
- The maintenance due date is the last day the certification is active. **NCC Certified professionals do not need to wait until their maintenance deadline to apply.** As long as they have obtained the required contact hours of continuing education credit - maintenance applications can be submitted up to 12 months before this date to avoid a lapsed certification while the maintenance application is in review. Maintenance will be due in the quarter in which they were notified of their certification (not the date on which they took the examination). Maintenance due dates can be found by signing into the certified professional’s NCC account. Sign into the account using the associated email and password.

The NCC website has more detailed information
For more information about the certification maintenance program, click the purple "Maintain your Certification" box.
