2024 Candidate Guide
Neonatal Nurse Practitioner
NNP-BC®

Congratulations on taking the next step in your career – earning your NNP-BC certification!

Information Included:
Fees & General Policies  2-5
About the Exam  6
Exam Content  7-9
Study Guides  10-17
Study Resources  18
Sample Questions  19
Scoring & Test Report  20-21
Terms of Certification and Certification Maintenance  2-23

About this Guide
This guide lists fees and provides information that will help candidates prepare for the examination. It includes the exam content in outline form, competency statements and study guide. It also provides sample exam questions to familiarize the test taker with question format, study resources and lists some of NCC administrative policies & procedures. It is recommended that candidates familiarize themselves with the information in this guide.

NCC examinations are offered in several different test administrations options. The NCC publication Guide to Testing Methods will explain the different rules and policies based on how the candidate is taking the examination. Please download this publication from the NCC website and review the exam administration options. It will answer any questions about the NCC examination process.

If there are other questions, please feel free to contact NCC through the “Contact Us” page at NCCwebsite.org.

NCC’s Philosophy of Testing
Certification is an evaluative process that provides the opportunity for advanced practice nurses in the obstetric, gynecologic and/or neonatal specialty to demonstrate publicly what they know and to be recognized for the special knowledge they possess. The NCC certification carries no licensing authority. The ability to practice as an advanced practice nurse is regulated by the state boards of nursing, and while certification may be required in some states for advanced practice roles, NCC has no regulatory power to require states to recognize NCC certification for this purpose. Practice and educational standards are reflected in the certification process, but the responsibility for development of such standards rests with the professional nursing specialty organizations and the nursing educational community. NCC encourages individual advanced practice nurses to seek out information about how certification relates to state licensure requirements, program accreditation of the educational institutions attended, the educational and practice standards of national nursing specialty organizations, and employment expectations.

EXAMINATION AND RELATED FEES

EXAMINATION FEES*
Test Center and Live Remote Proctoring (LRP) Computer Exam Fees are $325 which includes the non-refundable $50 application fee.

*Examination fees are subject to change.

CANCELLATION: 6 HOUR WINDOW
Candidates have six hours from the time they submit an exam application to cancel the exam. The order can be canceled by logging into the account and clicking on "Cancel Application" found under the new certification. Only the candidate can cancel the application and they must meet the 6-hour window. After the six hours they must withdraw or pay for a change.

CHANGE REQUEST
Candidates who cannot take their currently scheduled examination, have missed their testing date or need to take a different exam - can request a change for a fee of $125. Details are on the NCC website.

WITHDRAWAL FEE
A Testing Center or LRP testing candidate who withdraws from testing is subject to a $165 withdrawal fee. The candidate will receive $160 of their $325 payment, minus any outstanding charges. Bulk Purchase Voucher candidates cannot withdraw.

RETEST FEE
Retest candidates must pay full application and examination fees. There are no discounts and they must complete a 90-day wait period* before resubmitting an application for testing. (*see Retest Policy page 4). Certification exams of the same specialty can only be taken TWICE in a calendar year for the same candidate. Candidates must submit a new application and again demonstrate eligibility and licensure.

SUBSTITUTION FEE
Candidate substitutions are not allowed for any reason.

THIRD PARTY PAYMENTS
Applicant fees paid by third parties will be refunded to the third party in accordance with stated refund policies, in the event the applicant is determined ineligible or withdraws within the specified time. Vouchers are nonrefundable.
PAYMENT INFORMATION

• All applications are subject to a nonrefundable application fee.
• All fees are nonrefundable except where otherwise noted.
• Payments can be made by credit card (Visa, American Express and MasterCard only). NCC does not accept debit cards or split payments (part check and part credit card).
• Payments can be made by e-check: bank routing number and account number required.
• For payments made by third parties, any refund will be issued to the third party and not to the applicant. Vouchers are nonrefundable.
• All payments must be in US funds.
• Exam fees can only be submitted online at the NCC website. Applications will not be accepted by mail, phone or fax.
• NCC will accept group payments for certification exams from institutions. Details are on the NCC website under Bulk Purchases.

OTHER NON-REFUNDABLE PAYMENT RELATED FEES

INCOMPLETE APPLICATION FEE
All incomplete applications are subject to a non-refundable $30 reprocessing fee upon the submission of proper documentation. Incomplete applications are those submitted with missing information, (e.g. required licensure information and corroborating uploaded documentation; containing incomplete or incorrect information; or do not include full fee payment).

RETURNED CHECKS AND CREDIT CARD CHARGEBACK FEE
A $30 fee will be assessed for any check or e-check returned or a credit card payment disputed for any reason. Remittance thereafter of all fees and applications must be in the form requested by NCC.

LICENSE VERIFICATION
If licensure information is requested requiring an additional submission, the candidate will have two weeks to provide the license with all the correct information and pay the non-refundable $30 reprocessing fee. If this is not provided within the two weeks, the application will be marked ineligible. Ineligible applicants will receive a refund minus the $50.00 non-refundable application fee. There are no refunds or withdrawals for applications using a bulk code.

VERIFICATION OF CERTIFICATION
Third party notification of status will NOT be released without authorization from the NP. A $30 fee is required for any third-party notification or issuance of duplicates of test results reports. Verification requests can only be submitted after official results with score report have been uploaded to the candidate’s NCC account.

Verification requests can only be made via the online verification system on the NCC website. NCC does not issue verifications via the mail or fax.

Certification will be revoked or withheld if a returned check or a chargeback request on a credit card payment results in loss of income to NCC and the monies are not recovered in an alternate payment. Fees received at any time will first be applied to any unpaid prior certification/special fees.
**General Policies**

**Exam Category Changes**
Candidates can only request an exam category change by completing a Change Request Form on the NCC website and submitting with non-refundable payment of $125. **Candidates are only allowed one change request** (e.g. After a change request is submitted no other change request can be submitted). All change requests must be approved by NCC. **There will be no refund of original or Change Request fees.** Eligibility must be re-established for the new exam category, and additional documentation and fees may be required. The time to consider eligibility for the new category will count toward the original assigned 90-day testing window. **Examination category cannot be changed from a subspecialty or RN Core application to a NNP or WHNP certification.** Examinees must take the exam for which they have been determined eligible. **No changes will be permitted on examination day.** If a candidate knowingly or unknowingly takes an examination other than the one they were found eligible to take, the examination will not be scored. No refunds will be allowed, and all fee policies will apply if the candidate reapplies for an examination. See website for complete details.

**Retest Policy**
Candidates may retake the examination if they do not pass. They must reapply 90 days after the test was taken, submit all applicable fees and documentation, and re-establish eligibility according to the appropriate deadlines. There is no limit to the number of times a candidate may retake the examination. **However, the maximum number of times a candidate can take the same NCC test in a calendar year is two.**

All retest candidates must wait 90 days from the date their exam was taken before they can submit a new application to retest.
- this date is provided in the candidate’s results notification
- this 90-day wait period affects all modes of testing

Any loss of power or internet during an exam in which there was more than 15 minutes of testing with exposure to more than 10% of the exam requires a retest at a Test Center. Candidates will have to wait 90-days before they can reschedule and they must follow NCC’s retest policy. A decision on the timing of a second attempt will be made after NCC reviews the test exposure. There is no need to complete a new application, but candidates MUST notify NCC of the internet disconnection issue as soon as computer access is available.

If a retest application is submitted prior to the 90-day wait period, the application will be returned as ineligible. The applicant will be subject to the $50 non-refundable application fee.
Fees & General Policies

Review Courses and Materials
NCC does not offer or sponsor review courses or review materials for its certification examinations. Examination candidates should view any course of study as being independent of NCC. Candidates should carefully examine the merits of any individual exam preparation offering before participating.

Test Disclosure
NCC does not make test questions available for review. Because test questions may be used for more than one examination administration, distributing this information would compromise the security of the test questions and would increase the cost of certification if the questions had to be replaced each year.

Revocation
Your certification may be revoked for falsifying any information submitted to determine eligibility to take the certification examination or for maintaining certification, for losing your license to practice nursing, or for failing to pay designated certification or maintenance fees.

Policies are Subject to Change without Notice.

General Policies (continued)

Internet Disconnections
If the candidate has started the exam and is disconnected, please use the PSI tech lines if testing with LRP or if at a Test Center discuss immediately with the proctor to attempt to get reconnected and continue testing.

If the candidate is unable to get reconnected after starting the exam, the timing for a second attempt to take the exam will be based on how much time and how many questions they were exposed to. If a candidate is disconnected and cannot be reconnected and has tested for under 15 minutes and were exposed to less than 10% of the exam they may be able to reschedule within their current eligibility window. Candidates must work directly with PSI that day to reschedule and if they run into any issues they must notify NCC within 3 days of testing. If a candidate tests for longer than 15 minutes and/or saw more than 10% of the questions on the exam they will have to wait 90 days before they can reschedule, and they must follow NCC’s retest policy. A decision on the timing of a second attempt will be made after NCC reviews the test exposure. Please note, candidates will need to retest at a Test Center. Please notify NCC of the internet disconnection issue as soon as computer access is available.

Appeals Procedure
Any request to waive any policy of the NCC Board of Directors relative to eligibility, administration, examination content issues, or certification maintenance must be received in writing within 60 days of the dispute. All requests should be sent to the attention of the NCC President at nccpresident@nccnet.org. The correspondence should contain a detailed account as to why the NCC policy should be waived or the candidate’s status should be changed. Such requests are referred to the NCC Policy Review Committee of the Board of Directors. All decisions will be provided in writing. Cases not resolved by the Policy Review Committee will be referred to the full Board of Directors.

Designation Authorization
Certification is a non-transferable, revocable, limited, non-exclusive license to use the certification designation “NNP-BC®”, subject to compliance with the policies and procedures, as may be revised from time to time.

Any use or display of NCC certification marks and/or logos without the prior written permission of the NCC is prohibited. Any candidate or certificant who manufacturers, modifies, reproduces, distributes or uses a fraudulent or otherwise unauthorized NCC certificate, NCC designation or other credential may be subject to disciplinary action, including denial or revocation of eligibility or certification. Any individual who engages in such behavior also may be subject to legal action.
**About the Exam**

**Timed Examination**
Three (3) hours are allotted to complete the examination.

**Exam Format**
The Neonatal Nurse Practitioner examination consists of up to 175 test questions. 150 are scored and the remainder are embedded in the exam as pretest items. The pretest items do not count toward the examinee’s final results.

- There is one question format used for all NCC examinations.
- Each question has a premise (stem) and three possible answers, two distractors and only one correct answer.
- The answer options are alphabetized by the first word in each answer option to randomize the answers.
- Tests are delivered in a different random order for each candidate.
- Questions will test both basic knowledge and application of knowledge.
- Questions that contain laboratory data will show results in conventional units of measure with international units in parentheses.
- Drugs are listed in both generic and trade names where appropriate.

**Examination Content Development**
The development of NCC certification involves many individuals and involves a meticulous process of review. There are three major groups that contribute to the test development process:

**Item Writers:**
NP’s and others identified with special expertise have the responsibility of drafting test items per designated assignment for review by the content team and expert reviewers. Item writers are solicited from the NCC certified population, by recommendations or through the volunteer portal.

**Reviewers:**
Reviewers are NP’s or other designated experts who assist the content teams in review of test items developed by the item writers. Reviewers are responsible for reviewing items for content relevance and confirming that references cited for the questions support the items as written.

**Content Teams:**
Content team members are experienced practitioners and are appointed on an annual basis by the NCC President. Content teams are solicited from the NCC certified population, by recommendations or through the volunteer portal. To see the current membership composition of the Content Team responsible for the Neonatal Nurse Practitioner examination, please visit the NCC website under the section on NCC Leadership.

Content team members are NP’s or other identified experts who:
- develop and update the test outline and competency statements
- review test items developed by item writers
- review item statistics from exam administrations and pretest examinations
- approve the exam forms to be administered
- review item banks

In addition, NCC uses volunteers for standard setting and content validation studies/job analysis studies.
The above chart shows the percentage distribution of questions on the Neonatal Nurse Practitioner exam across the major content categories covered on the examination. The major focus of the examination is on Embryology, Physiology, Pathophysiology and Systems Management. Less emphasis is on General Management, General Assessment and Pharmacology while the Professional Issues category has the lowest percentage of content covered on the exam.
EXAMINATION CONTENT

EXAM OUTLINE

Areas of knowledge to be tested on the Neonatal Nurse Practitioner examination are listed in the following outline. This list is not intended as an all-inclusive review of the role and scope of knowledge of the neonatal nurse practitioner. It is provided only to help certification candidates evaluate their own nursing practice.

Percentages identified for the topic areas represent the number of test questions assigned to each content area. These areas do not necessarily reflect the content of future examinations.

11.00 General Assessment (15%)
- Maternal History affecting the Newborn
- Neonatal
- Family Integration
- Discharge Preparation and Follow-up Care

12.00 General Management (19%)
- Thermoregulation
- Resuscitation and Stabilization
- Growth and Nutrition
- Fluids and Electrolytes

15.00 Pharmacology (9%)
- Pharmacokinetics and Pharmacodynamics
- Common Drug Therapies

13.00 Embryology, Physiology, Pathophysiology and Systems Management (54%)
- Cardiac
- Respiratory
- Gastrointestinal
- Renal/Genitourinary
- Metabolic/Endocrine
- Hematopoietic
- Infectious Diseases
- Musculoskeletal
- Integumentary
- Genetics
- Neurological
- Ears, Eyes, Nose & Mouth/Throat

14.00 Professional Issues (3%)
- Including: (e.g. Legal, Ethical, Neonatal Safety and QI)
EXAMINATION CONTENT

ASSOCIATED COMPETENCIES

- Demonstrate the knowledge inherent in the role and scope of NNP practice
- Apply knowledge of basic sciences to the provision of neonatal health care
- Obtain and interpret a comprehensive perinatal history and a systematic assessment of all body systems
- Obtain clinical laboratory information and interpret the resultant data
- Institute diagnostic procedures and techniques and interpret the resultant data
- Apply critical thinking to diagnose reasoning and clinical decision make with the care giver and family
- Evaluate the benefits and risks of diagnostic and therapeutic intervention
- Use adult learning principles when teaching about the care, growth and development of the high-risk infant up to 2 years of age
- Formulate a diagnosis and a plan of care in collaboration with physicians, other health care professionals and family.
- Initiate appropriate therapeutic and educational interventions including consultations and referral
- Evaluate and document responses to interventions and modify the plan of care as indicated
- Maintain current knowledge regarding advances in neonatal health care
- Apply knowledge of basic research principles to practice
- Integrate legal and ethical principles into neonatal health care
GENERAL ASSESSMENT

I. Maternal History affecting the Newborn

Antepartum
- Neonatal complications: maternal risk factors & complications
  - gestational hypertension
  - cardiac/pulmonary disease
  - diabetes
  - common infectious diseases
  - common hematologic diseases
  - placental insufficiency
  - substance abuse
  - medication effects
    - common prescription or non-prescription drugs
- Fetal assessment
  - fetal fibronectin
  - nonstress test
  - biophysical profile
  - ultrasound/doppler flow
  - amniocentesis
  - antenatal screening/quad screen
- Fetal procedures

Intrapartum
- Fetal Heart Rate (FHR) Patterns
- Effects on the Fetus/Neonate
  - tocolysis/induction
  - analgesia
  - anesthesia
  - neuroprotective agents
- Intrapartum Complications
  - amniotic fluid volume
  - oligohydramnios
  - polyhydramnios
- Rupture of Membranes
  - premature
  - prolonged

II. Neonatal

Physical Examination & Gestational Age/Behavioral Assessment Identify Normal, Normal Variants and Abnormal Findings
- General appearance
- Head, eyes, nose, ears and mouth
- Neck and throat
- Chest
- Abdomen
- Spine/back
- Extremities
- Genitalia
- Musculoskeletal
- Skin
- Vital signs
- Gestational age assessment physical Characteristics of
  - preterm
  - term
  - post-term
  - AGA
  - SGA
  - LGA
- Associated risks/Complications of variations in gestational age
- Abnormalities of intrauterine parameters
- Behavioral assessment
  - state
- Muscle movement/tone/reflexes
- Autonomic control/responses
- Neurosensory capabilities
- Neurological assessment

Intrauterine Drug Exposure
- Nicotine
- Alcohol
- Prescription/nonprescription
- Illicit Drug
Clinical Laboratory Tests
• Microbiological
• Biochemical
• Hematological
• Endocrine
• Immunologic
• Genetic

Diagnostic Studies, Techniques and Equipment

Diagnostic studies
• Ultrasound/Doppler
• CT scan
• MRI
• X-ray/fluoroscopy
• EKG
• EEG
• Echocardiogram
• Voiding Cystourethrogram

Techniques & Equipment
• Procedures
  - bag and mask ventilation and T-piece
  - LMA’s
  - endotracheal intubation
  - umbilical vessel and peripheral catheterization
  - chest tube insertion/removal
  - needle aspiration
  - spinal/lumbar tap
  - intraosseous access
  - intravenous line placement (central/peripheral)
  - blood sampling
  - circumcisions - complications/contraindications

• Equipment
  - cardiopulmonary monitors
  - oxygenation equipment/end tidal CO₂ monitoring
  - invasive/non-invasive blood gas monitoring
  - indwelling catheters
  - incubators/radiant warmers
  - ventilators
  - phototherapy

III. Family Integration

Communication
• Family centered care
• Barriers to parent/infant interaction

Grieving Process
• Stages of grieving and common behaviors
• Factors influencing enhancement or impediment of grief process
• Palliative care/End of life
• Parental depression

IV. Discharge Planning and Follow Up

• Anticipatory guidance
• Follow up screening
• Hearing
• Vision - ROP
• Developmental
• Health risks
• Discharge preparation
• Follow-up care
I. Thermoregulation
- Mechanisms and management of heat transfer
  - evaporation
  - conduction
  - convection
  - radiation
- Rewarming techniques
- Mechanisms of heat production
- Temperature assessment
- Neutral thermal environment

II. Resuscitation and Stabilization
- Transition to extrauterine life
- Delivery room assessment
- Techniques of resuscitation
- Indications for interventions
- Cord blood gas interpretation
- Neonatal transport

III. Growth and Nutrition
- Physiology of Digestion and Absorption
- Nutritional Requirements
- Enteral Feeding
- Parenteral Nutrition
- Composition of Breast Milk/Formulas/Donor milk
- Dietary Supplementation

IV. Fluids and Electrolytes
- Common problems and conditions
- Fluid & Electrolyte requirements
- Insensible water loss/gain
- Central & peripheral infusion
- Acid base balance
- Fish oil emulsion (Omegaven) SMOF
I. Pharmacokinetics & Pharmacodynamics
- Pharmacokinetics
  - distribution
  - excretion
  - absorption
  - metabolism
  - withdrawal
- Principles of administration
  - dosage/interval
  - route
  - tolerance/weaning

II. Common Drug Therapies
- Analgesia/narcotics
- Anticoagulants
- Anticonvulsants
- Antihypertensive drugs
- Antimicrobials
  - biologies/immunities
  - vaccinations
- Cardiovascular drugs
  - vasodilators/vasopressors
  - antidysrhythmia drugs
- Diuretics
- GI drugs
  - antacids
  - prokinetic
  - proton pump inhibitors
- Inhalants
  - iNO
- Neurologic agents
  - anesthetics agents
  - sedatives
  - hypnotics
- Respiratory drugs
  - bronchodilators
  - respiratory stimulants
  - surfactant therapy
- Steroids
- Drugs and breastfeeding
  - Drug transfer
  - Drug safety
STUDY GUIDE

EMBRYOLOGY, PHYSIOLOGY, PATHOPHYSIOLOGY & SYSTEMS MANAGEMENT

I. Cardiac
- Congenital Cardiac Defects
  - cyanotic
    - Ebstein’s Anomaly
    - Tetralogy of Fallot
    - truncus arteriosus
    - transposition of great vessels
    - total anomalous pulmonary venous return
    - tricuspid atresia
  - acyanotic
    - ventricular septal defect
    - coarctation of aorta (interrupted arch)
    - atrial septal defect
    - septal defect
    - hypoplastic left heart syndrome
    - endocardial cushion defect (AV canal)
    - aortic stenosis
- Patent ductus arteriosus
- Congestive heart failure
- Hypertension/Hypotension
- Shock
- Dysrhythmias
- PGE’s

II. Respiratory
- Respiratory distress syndrome
- Transient tachypnea
- Pneumothorax and air leaks/chylothorax
- Congenital pulmonary airway malformation (CPAM)
- Cystic pulmonary
- Apnea of prematurity
- Meconium aspiration
- Diaphragmatic eventrations
- Persistent pulmonary hypertension
- Pneumonia
- Pulmonary hemorrhage
- Pulmonary hypoplasia
- Diaphragmatic hernia
- Chronic lung disease
- Laryngeal, tracheomalacia/stenosis
- Respiratory support
  - principles and methods of oxygen
  - administration/ventilation
  - risk factors affecting oxygenation/ventilation
  - oxyhemoglobin dissociation curve
  - high frequency ventilation (HFV)
  - extracorporeal membrane oxygenation (ECMO)
  - nitric oxide
  - neurally adjusted ventilatory assist (NAVA)
  - nasal intermittent positive pressure ventilation (NIPPV)
  - noninvasive ventilation (NIV)

III. Gastrointestinal
- Development of the GI tract
- Digestive and absorptive disorders
  - diarrhea/short gut
- Disorders of suck/swallow/motility
  - GERD
  - cleft lip palate
  - Duodenal atresia
  - tracheoesophageal fistula
  - esophageal atresia
  - small left colon syndrome
  - Hirschsprung disease
  - volvulus
  - imperforate anus
  - pyloric stenosis
- Malabsorption/maldigestion
- Diarrhea/short gut
- Anomalies/obstruction of upper and lower GI tract
  - small left colon syndrome
  - Hirschsprung’s disease
- Abdominal wall defects
  - gastroschisis
  - omphalocele
- Obstructions
- Perforations
- Meconium ileus
- Tracheoesophageal fistula
- Necrotizing enterocolitis
- Inguinal hernia
IV. Renal/Genitourinary
• Renal vein/artery thrombosis
• Acute renal failure/insufficiency
• Polycystic/multicystic dysplastic kidneys
• Urinary outflow tract obstruction
• Testicular torsion
• Exstrophy of the bladder
• Hypospadias/epispadias
• Hydronephrosis grading system/hydroureter

V. Endocrine/Metabolic
• Adrenal disorders
• Ambiguous genitalia
• Calcium disorders
• Glucose disorders
• Magnesium disorders
• Phosphorus disorders
• Pituitary disorders
• Thyroid disorders
• Infants of diabetic mothers
• Osteopenia of prematurity

VI. Hematopoietic
• Hematological disorders
  - anemia
  - polycythemia
  - platelet disorders
  - coagulopathies
    - vitamin K deficiency
    - disseminated intravascular coagulation
    - factor deficiencies
    - neutropenia/neutrophilia
    - Rh disease and ABO incompatibility
• Blood component therapy
• Jaundice and liver disease
• Hyperbilirubinemia (direct and indirect)
  - Breastmilk jaundice
• Kernicterus
• Phototherapy
• Exchange transfusion
• Biliary atresia

VII. Infectious Diseases
• Normal immunologic function
• Common neonatal infections
  - group B streptococcal
  - e-coli
  - staphylococcal
  - klebsiella
  - enterococcus
  - candidiasis
  - pseudomonas
  - enterovirus
  - respiratory syncytial virus (RSV)
  - CMV
  - hepatitis B
  - toxoplasmosis
  - herpes
  - HIV/AIDS
  - chlamydia
  - gonorrhea
  - syphilis
  - varicella
• Neonatal sepsis
• SIRS
• Meningitis
• Septic shock
• Infection control and universal precautions
• MRSA/VRSE
• Osteomyelitis

VIII. Musculoskeletal
• Abnormalities of the skeleton
  - metatarsus adductus
  - achondroplasia
• Clubfoot
• Developmental dysplasia of the hip
• Spinal abnormalities
• Musculoskeletal birth injuries
  - fractures
  - nerve damage
  - torticollis
• Aperts, crouzon, etc.
IX. Integumentary
- General skin development and care
- Disorders
  - ecchymosis
  - epidermolysis bullosa
  - hemangiomas
  - ichthyosis
  - subcutaneous fat necrosis
- Milia/miliara
- Hyperpigmented macule
- Erythema toxicum
- Neonatal pustular melanosis
- Auricular tags
- Petechiae
- Port wine stain
- Hyper/hypopigmentation

X. Genetics
- Genetic processes
  - multifactorial inheritance
  - nondisjunction
  - translocation
  - deletion/duplication
  - sex linked inheritance
- Inborn errors of metabolism
- Hyperammonemia
- Newborn Screening
  - galactosemia
  - cystic fibrosis
- Chromosomal abnormalities/syndromes
  - Trisomy 21
  - Trisomy 13
  - Trisomy 18
  - Turner syndrome
  - Beckwith-Wiedemann syndrome
  - DiGeorge syndrome
- Osteogenesis imperfecta
- Potter sequence
- VATER/VACTERL
- CHARGE

XI. Neurological
- Perinatal – depression/asphyxia
- Hypoxic ischemic encephalopathy
  - therapeutic hypothermia
- Cranial hemorrhages
- Hydrocephalus
- Neural tube defects
- Seizures
- Jitteriness
- Periventricular leukomalacia
- Auto regulation
- Cerebral palsy
- aEEG
- Near-infrared spectroscopy (NIRS)
- Congenital neuromuscular disorders
- Craniosynostosis

XII. Ears, Eyes, Nose and Throat
- Eyes
  - eye prophylaxis
  - cataracts
  - coloboma
  - glaucoma
  - retinopathy of prematurity
  - strabismus
  - conjunctivitis
- Nose
  - nasolacrimal duct obstruction
  - choanal atresia
  - deviated septum
- Ears
  - malformations
- Mouth/throat
  - cleft lip and palate
  - micrognathia/retrognathia
  - macroglossia
- airway obstruction
PROFESSIONAL PRACTICE ISSUES

Ethical Principles
- Autonomy
- Beneficence
- Non-maleficence
- Justice

Professional/Legal Issues
- Professional
  - Regulation
  - Practice
  - HIPPA
- Staffing issues
- Legal liability
  - Consent
  - Documentation/medical records
  - Negligence/malpractice

Evidence based practice
- Terminology
  - Reliability
  - Validity
  - Significance
  - Levels of Evidence

Quality Improvement
- Research utilization

Neonatal Safety
- Communication
- Interprofessional practice

SAMPLE QUESTIONS

NEONATAL NURSE PRACTITIONER SAMPLE QUESTIONS

Listed below are five sample questions to acquaint the candidate with the test question format. These questions do not reflect the scope or the difficulty level of the questions on the actual examination. The reference from which each question is derived is also cited. However, other references might substantiate a different answer, and the answer shown here might be substantiated by other references.

The rigorous review to which actual test questions are subject is not applied to these sample questions. The focus that should be attended to in reviewing these items is format, not content.

1. The goal of treatment of gastroesophageal reflux in the premature neonate is to
   A. achieve normal gastric emptying  
   B. decrease lower esophageal sphincter pressure  
   C. increase gastric pH

   Answer: A

   Martin, et al., Fanaroff and Martin’s Neonatal Perinatal Medicine Diseases of the Fetus and Infant, Elsevier Mosby, St. Louis, 2020, 1517

2. When auscultating the lungs of a neonate, the nurse practitioner hears stridor. This most likely indicates
   A. bronchospasm  
   B. inflammation of the pleura  
   C. subglottic stenosis

   Answer: C

   Tappero, et al., Physical Assessment of the Newborn, Springer, 2019, p. 88

3. Upper and lower extremity blood pressures should be taken for the neonate with decreased femoral pulses to evaluate for
   A. coarctation of the aorta  
   B. patent ductus arteriosus  
   C. transposition of the great arteries

   Answer: A

4. The recommended hepatitis B immunization schedule for a neonate born to a hepatitis B surface antigen (HBsAg) positive mother is

<table>
<thead>
<tr>
<th>Initial</th>
<th>Second</th>
<th>Third</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. At birth</td>
<td>1 month</td>
<td>6 months</td>
</tr>
<tr>
<td>B. Before discharge</td>
<td>2 months</td>
<td>6 months</td>
</tr>
<tr>
<td>C. 0-7 days</td>
<td>1 month</td>
<td>12 months</td>
</tr>
</tbody>
</table>

   Answer: A

5. A neonate with bronchopulmonary dysplasia has the following blood gas values:

   pH 38  
   PCO₂ 50 mmHg  
   HCO₃ 29 mEq/L (mmol)  
   Base excess +3 mEq/L

   The best interpretation of the blood gas is
   A. compensated metabolic acidosis  
   B. compensated respiratory acidosis  
   C. normal value

   Answer: B

SCORING & TEST REPORT

HOW EXAMS ARE SCORED

NCC examinations are criterion-referenced. This means the passing score is based on a predetermined criterion. This criterion is a statistical ability level established by the Content Team based on evaluation of criticality of content and the test questions’ past statistical performance. Questions used to determine pass/fail have proven statistical history that demonstrates the question is appropriate for use to measure an individual’s ability level.

There is no set percentage passing level. An ability level for each candidate is calculated based on the number of questions they answer correctly (there is no penalty for wrong answers). Pass/fail is determined based on this ability level as compared to pass/fail standard which is a predetermined ability criterion. When different forms of the examination are used, a process called equating is initiated. This procedure converts all results to a common scale. So someone who takes a slightly more difficult form of the exam will need to answer fewer questions correctly than someone who takes a slightly easier form of the exam.

NCC utilizes the item response theory of psychometrics for the analysis of its examinations. Item response theory (Rasch analysis) is the study of test and item scores based on assumptions concerning the mathematical relationship between abilities and item responses. This is a commonly used system, and such examinations as the NCLEX and other health related certification examinations utilize this type of psychometric analysis.

Test reports identify pass/fail status, and they give feedback on the various content areas of the examination in the form of word descriptors: very weak, weak, average, strong and very strong. No percentages or standard scores are given. These descriptors are based on the items within a given subtest. The overall pass/fail decisions are based on the full test, and the verbal descriptors are intended to provide suggested feedback on strengths and weaknesses in various content areas. Since this feedback is based on relatively few items, general verbal descriptions are given instead of subtest scores. These word descriptors are for information only, and they should be interpreted cautiously due to the small number of items included in each content area.

HAND SCORING YOUR EXAMINATION

If you believe there might be a discrepancy in your test results, you may request a hand score for a fee of $55.

You must make this request via the NCC website within 60 days of receiving the pass/fail report by selecting that option from your NCC profile at NCCwebsite.org or go to the certification tab https://www.nccwebsite.org/certification-exams, scroll down to “Other helpful information” and click “Exam hand score request” to submit your request.
SAMPLE TEST REPORT

Candidates will receive an official test results report from NCC. It will be located in your NCC account. Shown below is a sample test result report for a candidate who has passed the examination.

NEONATAL NURSE PRACTITIONER EXAMINATION

Test Results

NAME
ADDRESS
Pass/Fail: PASS
Maintenance Due Date:
Your credential is designated as: NNP-BC® (Neonatal Nurse Practitioner - Board Certified)

EXAM CONTENT REPORT

Overall pass/fail decisions are based on your overall exam performance. A candidate must obtain a score equal to or higher than the “passing score” to pass the exam. A candidate’s performance on the examination is not compared to the performance of others taking the examination.

In addition, the test report provides you with feedback on the various content areas of the examination in the form of word descriptors: Very Weak, Weak, Average, Strong and Very Strong. No percentages or standard scores are given. These descriptors are based on items within a given subtest and are intended to provide suggested feedback on strengths and weaknesses in various content areas. Since this feedback is based on relatively few items, general verbal descriptions are given instead of subtest scores. Word descriptors for scoring are set using these ability levels and utilize equal intervals of scale above and below the pass point to provide additional feedback. See the Important Facts and Information on Test Results and Scores page for more detail. These word descriptors are for information only, and they should be interpreted cautiously due to the small number of items included in each content area.

Content Area (Percentage of Questions on Exam)          Your Results:
General Assessment (17%)                                 WEAK
General Management (19%)                                   AVERAGE
Embryology, Physiology, Pathophysiology and Systems Management (52%)  VERY STRONG
Pharmacology; Professional Issues (12%)                   AVERAGE
Terms of Certification and Certification Maintenance

After Passing the Exam

Credential
Successfully completing the Neonatal Nurse Practitioner exam entitles the newly certified candidate to use the credential NNP-BC® (Neonatal Nurse Practitioner-Board Certified)

Terms of Certification
NCC certification is awarded for a period of three years.

The effective date for certification is the date on the official NCC score report letter that shows a passed examination.

Maintenance Audits
Certificants must maintain the conference/CE description and/or objectives, along with the CE certificate which are required to be uploaded if chosen for random audit. Pre-approval of CE does not exempt a certificant from random audit.

No Continuing Education is Issued for Taking the Neonatal Nurse Practitioner Exam.

Maintaining Certification

- NCC certification must be maintained every three years.
- Certification that is not maintained will expire
- The NCC certification maintenance program allows certified nurses to continue their certification status by obtaining specific hours of continuing education credit as defined in their Education Plan, which is generated by their Continuing Competency Assessment (CCA).
- For continuing education credit to be used for certification maintenance it must be earned AFTER the certified nurse has taken the CAA and in the areas defined by the new Education Plan before their maintenance is due.
- The maintenance process includes submitting a maintenance application prior to the maintenance due date with appropriate fees and requested documentation. Using NCC CE modules does NOT automatically maintain your certification. Individuals must submit a maintenance application and pay a maintenance fee in addition to any CE fees.
- Maintenance applications are subject to random audit. If an individual is chosen for audit, they will be required to upload CE certificates and course descriptions. These records should be maintained during each maintenance cycle, until the maintenance application has been approved. Individuals can upload these documents in their maintenance application throughout their maintenance cycle. Documents from NCC modules are already on file with NCC and therefore are not requested or audited.
- The maintenance due date is the last day the certification is active. NCC Certified professionals do not need to wait until their maintenance deadline to apply. As long as they have obtained the required contact hours of continuing education credit - maintenance applications can be submitted up to 12 months before this date to avoid a lapsed certification while the maintenance application is in review. Maintenance will be due in the quarter in which they were notified of their certification (not the date on which they took the examination). Maintenance due dates can be found by signing into the certified professional’s NCC account. Sign into the account using the associated email and password.

The NCC website has more detailed information
For more information about the certification maintenance program and the Continuing Competency Assessment (CCA), click the purple "Maintain your Certification" box.
CONTINUING COMPETENCY ASSESSMENT (CCA)

NCC views certification as a process that functions throughout an individual nurse or nurse practitioner's career. It reflects life-long learning, ongoing professional development and is supported by maintaining specialty knowledge competencies.

The standard process for the NCC Certification Maintenance Program makes use of an assessment tool and resulting personal education plan:

- Complete the continuing competency assessment (CCA) that reflects the current knowledge competencies aligned with the certified nurse's certification specialty at the beginning of each new certification maintenance cycle.

- Individuals earn CE as specified by the education plan developed from their assessment. Their education plan outlines the CE needed to maintain their NCC certification. Only CE earned after they have taken their assessment can be used to maintain their certification. It must address the CE needs as outlined by their educational plan.

This program provides continuing validation that NCC certified nurses and nurse practitioners are maintaining their specialty knowledge competencies based on current practice and examination content.
